Reflecting on 10 Years of SDSN

John Thwaites

SDSN Co-Chair, Professorial Fellow, Monash University, and Chair of the Monash Sustainable Development Institute and ClimateWorks Australia

At the Rio+20 Summit a decade ago, the UN member states launched a process to develop a set of Sustainable Development Goals (SDGs) to put the world on the path to sustainable development that combines economic wellbeing, social justice, and environmental sustainability. We are now in the midst of the great global effort to create a global path to sustainable development that “leaves no one behind.”

Universities and knowledge institutions have an essential role to play in meeting this great challenge. Through cutting-edge research, they provide much of the new knowledge and innovation that is needed. Through their educational activities, they provide future leaders with the skills needed to understand and implement sustainable development. As trusted institutions committed to inclusion, truth, and social justice, universities are uniquely placed to help convene all stakeholders to work together to solve the pressing problems of the age.

SDSN was created by UN Secretary General Ban Ki-moon and Professor Jeffrey Sachs with this goal uppermost in mind: mobilize the world’s universities and knowledge institutions to play their historic role in the great transformation to sustainable development. The Secretary General tasked the new network to “work with stakeholders including business, civil society, UN agencies and other international organizations to identify and share the best pathways to achieve sustainable development.”

The first meeting of the Leadership Council of SDSN took place in New York in November 2012 with more than 70 top scientists and leaders from business, politics, and civil society in attendance. Professor Sachs told the new Leadership Council that “In the 20 years since the first Rio Earth Summit, the world has largely failed to address some of the most serious environmental and social problems pressing in on us. We can’t afford business as usual. We need to engage the academic and scientific community and tap into worldwide technological knowhow in the private sector and civil society, in order to develop and implement practical solutions.”

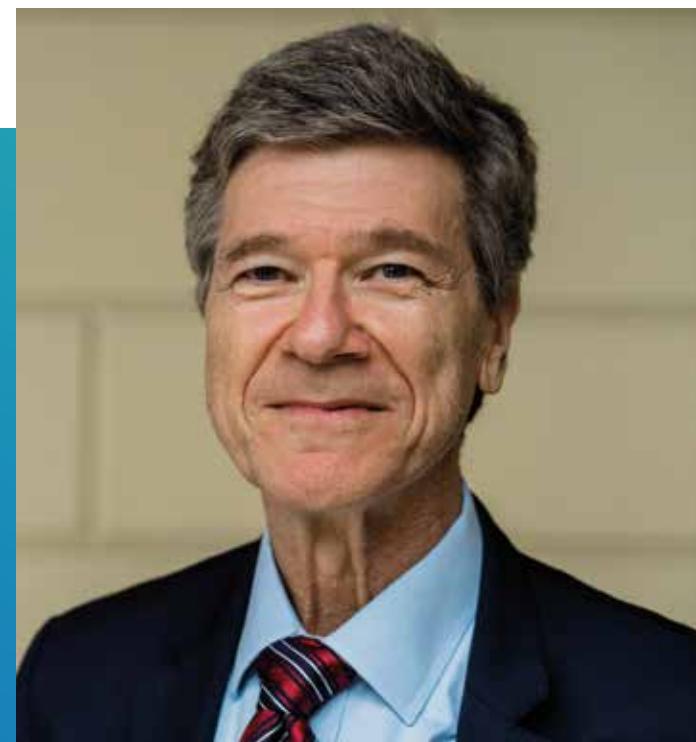

Ten years after the launch of SDSN it is worth reflecting on the growing global role of the SDSN and its achievements

The first achievement was to provide expert input into the development of the Sustainable Development Goals (SDGs). In the years 2012 to 2015, the SDSN established 10 global expert groups to support global problem solving in ten critical areas, including economic growth, jobs, poverty reduction, gender equality, universal access to healthcare, the transition to low carbon energy, and sustainable cities. These expert groups provided inputs to the UN processes responsible for designing and adopting the new goals. As one leading example, the SDSN Sustainable Cities Thematic Group, a key player in the UrbanSDG campaign, was instrumental in securing a sustainable cities goal (SDG11).

A second major achievement has been to create an extraordinary global network of universities and knowledge institutions covering most of the world. There are now 1,728 SDSN member institutions from 143 countries, making the SDSN by far the largest such organisation in the world. The SDSN is successfully promoting collaboration across countries, enabling universities to share their knowledge and to learn from each other's experience. In this period, SDSN has set up 50 national and regional networks. These have become vibrant and effective supporters of the 2030 Agenda, helping anchor and operationalize the SDGs. SDSN networks are locally led and therefore responsive to local needs but they draw on the expertise of the SDSN's over 1700 institutional members, and are connected to a vast range of international experts and to the United Nations. This ecosystem of collaboration has stimulated innovation and the development of successful solutions, it has helped influence public debates around sustainable development and provide the most advanced scientific knowledge to serve policy definition.

This is particularly relevant at a time of geopolitical tensions, when barriers are rising between countries. The SDSN is making extra efforts to ensure that dialogue and collaboration continues globally. National governments may have enemies, but sustainable development needs

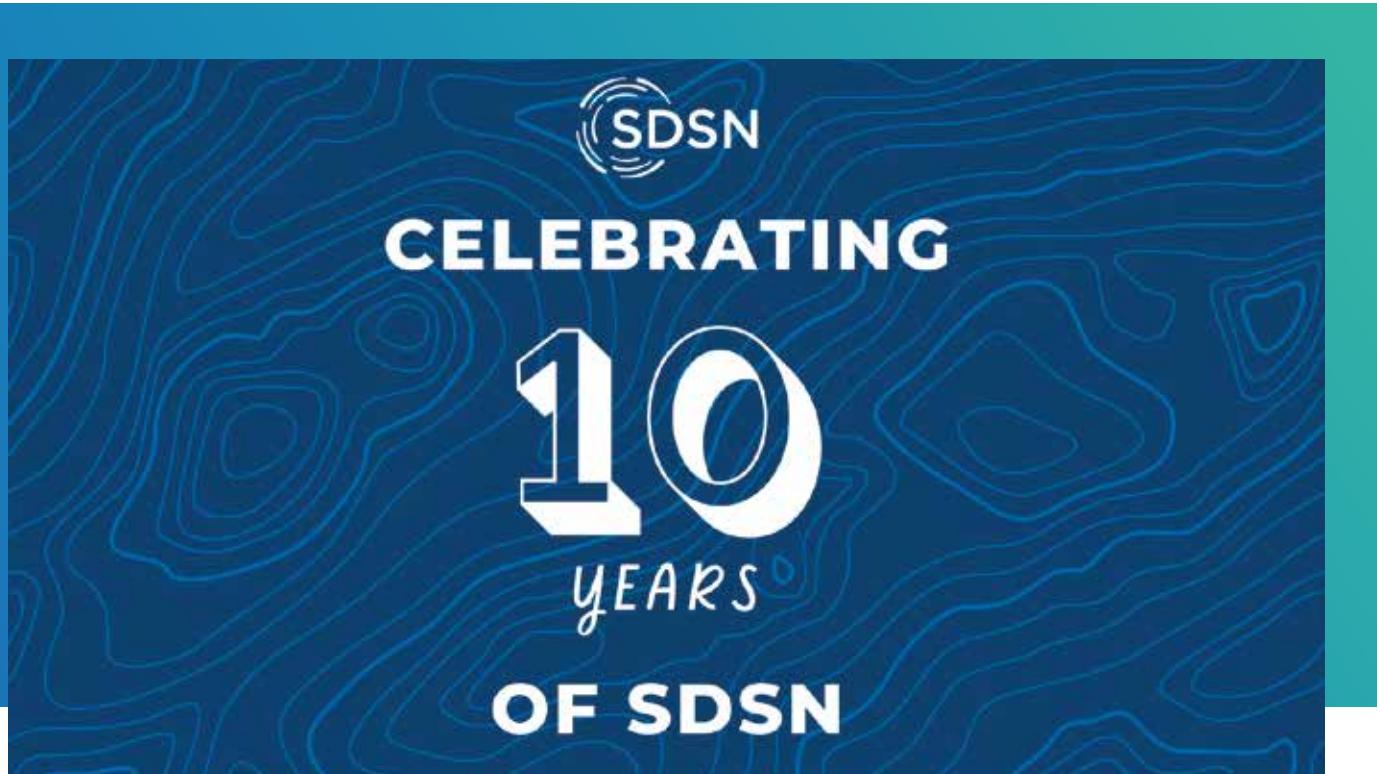

Jeffrey Sachs, President, SDSN

the cooperation and participation of all nations – and such a global and cooperative ethic is very much part of the life of scholars around the world and at the core of the SDSN.

A third major achievement has been to establish several large-scale global research initiatives aimed at finding solutions to sustainable development challenges. As one example of which SDSN is deeply proud, the Deep Decarbonization Pathways Project (DDPP) led by SDSN, with the Institute for Sustainable Development and International Relations (IDRI) at Science Po, brought together 16 research teams from countries representing 75% of global carbon emissions. Starting in 2013 and finishing in 2015, the teams developed roadmaps for deep decarbonization in their respective countries. This was the first time that country-based plans had been brought together in a global collaborative exercise. The DDPP influenced national climate policies and helped to demonstrate in the lead up to the Paris Climate Conference (COP21) that a global

“Achieving the SDGs will require deep transformations. These will only be possible if we work collaboratively across disciplines, sectors, and countries. With over 1600 institutional member institutions, grouped in 50 national and regional networks, SDSN has managed to successfully create an ecosystem of collaboration that is accelerating progress on sustainable development. The SDSN model demonstrates that through collaboration, we can implement solutions that are innovative and impactful. For this, we look forward to continuing to expand our global network!”

Maria Cortes-Puch
VP of Network Program, SDSN

“Over the past decade SDSN has built a broad and deep network of universities around the world who have the expertise to develop context-specific, shovel-ready solutions to the complex sustainable development challenges of today. At the same time they have leveraged their teaching experience to train the next generation of leaders through diverse educational programs for learners of all ages”

Lauren Barredo
Chief of staff, SDSN

commitment to deep decarbonization by mid-century was both possible and appropriate.

Through the DDP, SDSN played an instrumental role in developing and popularising the concept of long-term pathways using the process of “back-casting,” that is, to work backwards from a clear and quantitative target in order to determine the investments and other transformations needed to achieve that target. The process has been adopted by SDSN research teams, such as the Food, Agriculture, Biodiversity, Land-Use, and bioEnergy (FABLE) Consortium, to identify low-carbon pathways, sustainable land-use and food system pathways, and financing needs for the SDGs.

In this spirit, SDSN has developed a Six Transformations Framework, based on a paper by Professor Sachs and colleagues first published in *Nature Sustainability*. This framework is helping to guide long-term transformation policies and investments by governments, business and civil society.

A fourth major achievement of SDSN has been to become a globally trusted source of information, data, and rigorous analysis on sustainable development. The Sustainable Development Report is published annually and is the ‘go to’ report ranking countries’ SDG performance (reported, in part, as the SDG Index) and analysing the trends and challenges faced by the UN member states. Alongside the global report, the SDSN also publishes more detailed regional, country, and sub-national reports. This SDSN information is helping governments and civil society to identify priorities for action and identify gaps that must be closed to achieve the SDGs.

This year is also the tenth anniversary of the World Happiness Report, published by SDSN, which reports on how people evaluate their own lives and wellbeing

“In less than ten years, SDSN has become the largest network of experts and scientist dedicated to implementing the SDGs.”

Each year, insights and data from the global network are featured in the Sustainable Development Report, providing the main international assessment of countries’ distance and progress towards the SDGs, used by governments and businesses from all around the world”

Guillaume Lafortune
VP & Head of Paris Office, SDSN

and provides insights into what makes people satisfied with their lives, and how governments can promote life satisfaction and wellbeing.

A fifth major achievement is SDSN’s support for Education for Sustainable Development. The SDG Academy is SDSN’s flagship education initiative. It brings together the world’s leading experts to provide free online courses on the SDGs and related topics to people all over the world – many of whom would not otherwise have the opportunity. Since 2014, more than 640,000 learners have enrolled in the SDG Academy courses.

The SDSN’s Global Schools program, with support from SDSN Youth, supports primary and secondary schools to integrate sustainable development into school curricula. And SDSN is sharing knowledge about sustainable development with students and the broader community through the International Conference on Sustainable Development (ICSD) hosted in New York in September alongside the UN General Assembly. The conference has grown from a few hundred attendees a decade ago to more than two thousand this year.

A sixth SDSN achievement, building on the growing network, is the increased collaboration between SDSN country and regional networks on many local, national, and regional initiatives helping all parts of the world to advance towards sustainable development. For example, SDSN has worked with scientists and other partners throughout the Amazon region to convene the Science Panel for the Amazon (SPA), bringing together more than 200 scientists to undertake an unprecedented assessment of the state of the Amazon ecosystems. SDSN networks have collaborated across regions and continents to organise conferences on SDGs, build shared data platforms and find solutions to climate challenges.

During the past decade, new and unexpected challenges have constantly arisen, and SDSN is always ready to adjust, adapt, and be helpful to the unexpected. SDSN has hosted, for example, The Lancet Covid-19 Commission in response to the pandemic. SDSN is hosting an ad hoc High-Level Working Group on SDG Stimulus, to address the growing financial challenges facing the developing countries. No doubt new and complex challenges will continue to arise – and SDSN will be there to help address them.

We at SDSN know that we still face a momentous set of challenges ahead. Sustainable development requires, most importantly of all, goodwill, trust, and cooperation among all nations. At a time of great geopolitical tensions and outright war, SDSN is more committed than ever to doing our part to mobilize the world’s knowledge, goodwill, energies of young people (and all people young at heart!) to work for peace, prosperity, social justice, and environmental sustainability.

We hope that you will join us in this great challenge of our time.

Unique Opportunities

SDSN Mobilize

SDSN Mobilize is our exclusive internal communications platform for all 1700+ SDSN member organizations around the world. Our aim is to help turn thoughts into action, provide inspiration, and facilitate the exchange of knowledge and expertise within our global network of problem solvers. The platform facilitates a direct line of communication between members, geographic and thematic networks, and the SDSN Secretariat. Mobilize is our members' one stop shop for networking and connecting.

As part of the SDSN online community, representatives from SDSN member institutions can identify and connect with peers, increase the outreach of their projects and activities, position their organization as leaders in their field, find new prospects for collaboration, ask questions, identify funding opportunities, and draw upon the community's ever-growing expertise. To date, SDSN Mobilize boasts around 4,000 individuals in this one-of-a-kind pool of sustainable development experts. The first Monday of the month, we shine a light on one of our incredibly diverse members, highlighting their work in our "SDSN Mobilize Member Mondays". Additionally, the platform features exclusive content like a comprehensive weekly compilation of funding opportunities in sustainable development. We also help our members apply for grants, participate in conferences, identify fellowships, publish research, and much more.

SDSN Mobilize invites all faculty and researchers at SDSN member institutions to join and actively participate.

Global Solutions Forum

The Global Solutions Forum brings together the people who are implementing local initiatives designed to help achieve the SDGs. They meet in an inclusive space to share progress, to highlight important takeaways, and to inspire one another to keep moving forward. As the leading global network of knowledge-creating institutions in support of the Agenda 2030, the SDSN has unique expertise and avant-garde solutions for sustainable development. Through the Global Solutions Forum, we are committed to showcase and highlight our members' most impactful solutions. This global event intends for them to gain global visibility and

recognition, but also serve as an important virtual gathering of experts to learn from one another and make a difference.

This initiative offers an opportunity for our Networks to engage their members and work with a variety of stakeholders, including the private sector, in implementing specific locally relevant solutions. Furthermore, it offers the selected Solution Initiatives widespread communication and media coverage, with the aim to promote the upscale of these Solution Initiatives worldwide.

Join the SDSN!

SDSN Youth

Global youth program empowering young people to create sustainable development solutions. SDSN Youth has 140 team members working in more than 30 different countries across 21 established Regional and National Networks. The programme has built a global movement of over 4000 program members. Each Regional/National Youth Network is embedded into its corresponding SDSN Network, focusing on mobilizing young people towards achieving the SDGs. The activities in the national and regional networks are coordinated by 17 active network coordinators.

ICSD (The International Conference on Sustainable Development)

Hosted jointly every September alongside the UN General Assembly by SDSN and the Global Association of Masters in Development Practice (MDP) Programs, ICSD is a global event that provides a forum for academia, government, civil society, UN agencies, and the private sector to come together to share practical solutions to achieve the Sustainable Development Goals (SDGs). This high-level event brings together more than 2,000 participants to hear the latest research on the SDGs and keynote addresses from heads of state, senior UN officials, CEOs, and global thought leaders. A number of SDSN networks and members intervene each year to present the most recent and most advanced knowledge and findings on sustainable development.

Our global network of problem solvers is always expanding. Join us and enhance national and regional capacity to address sustainable development challenges.

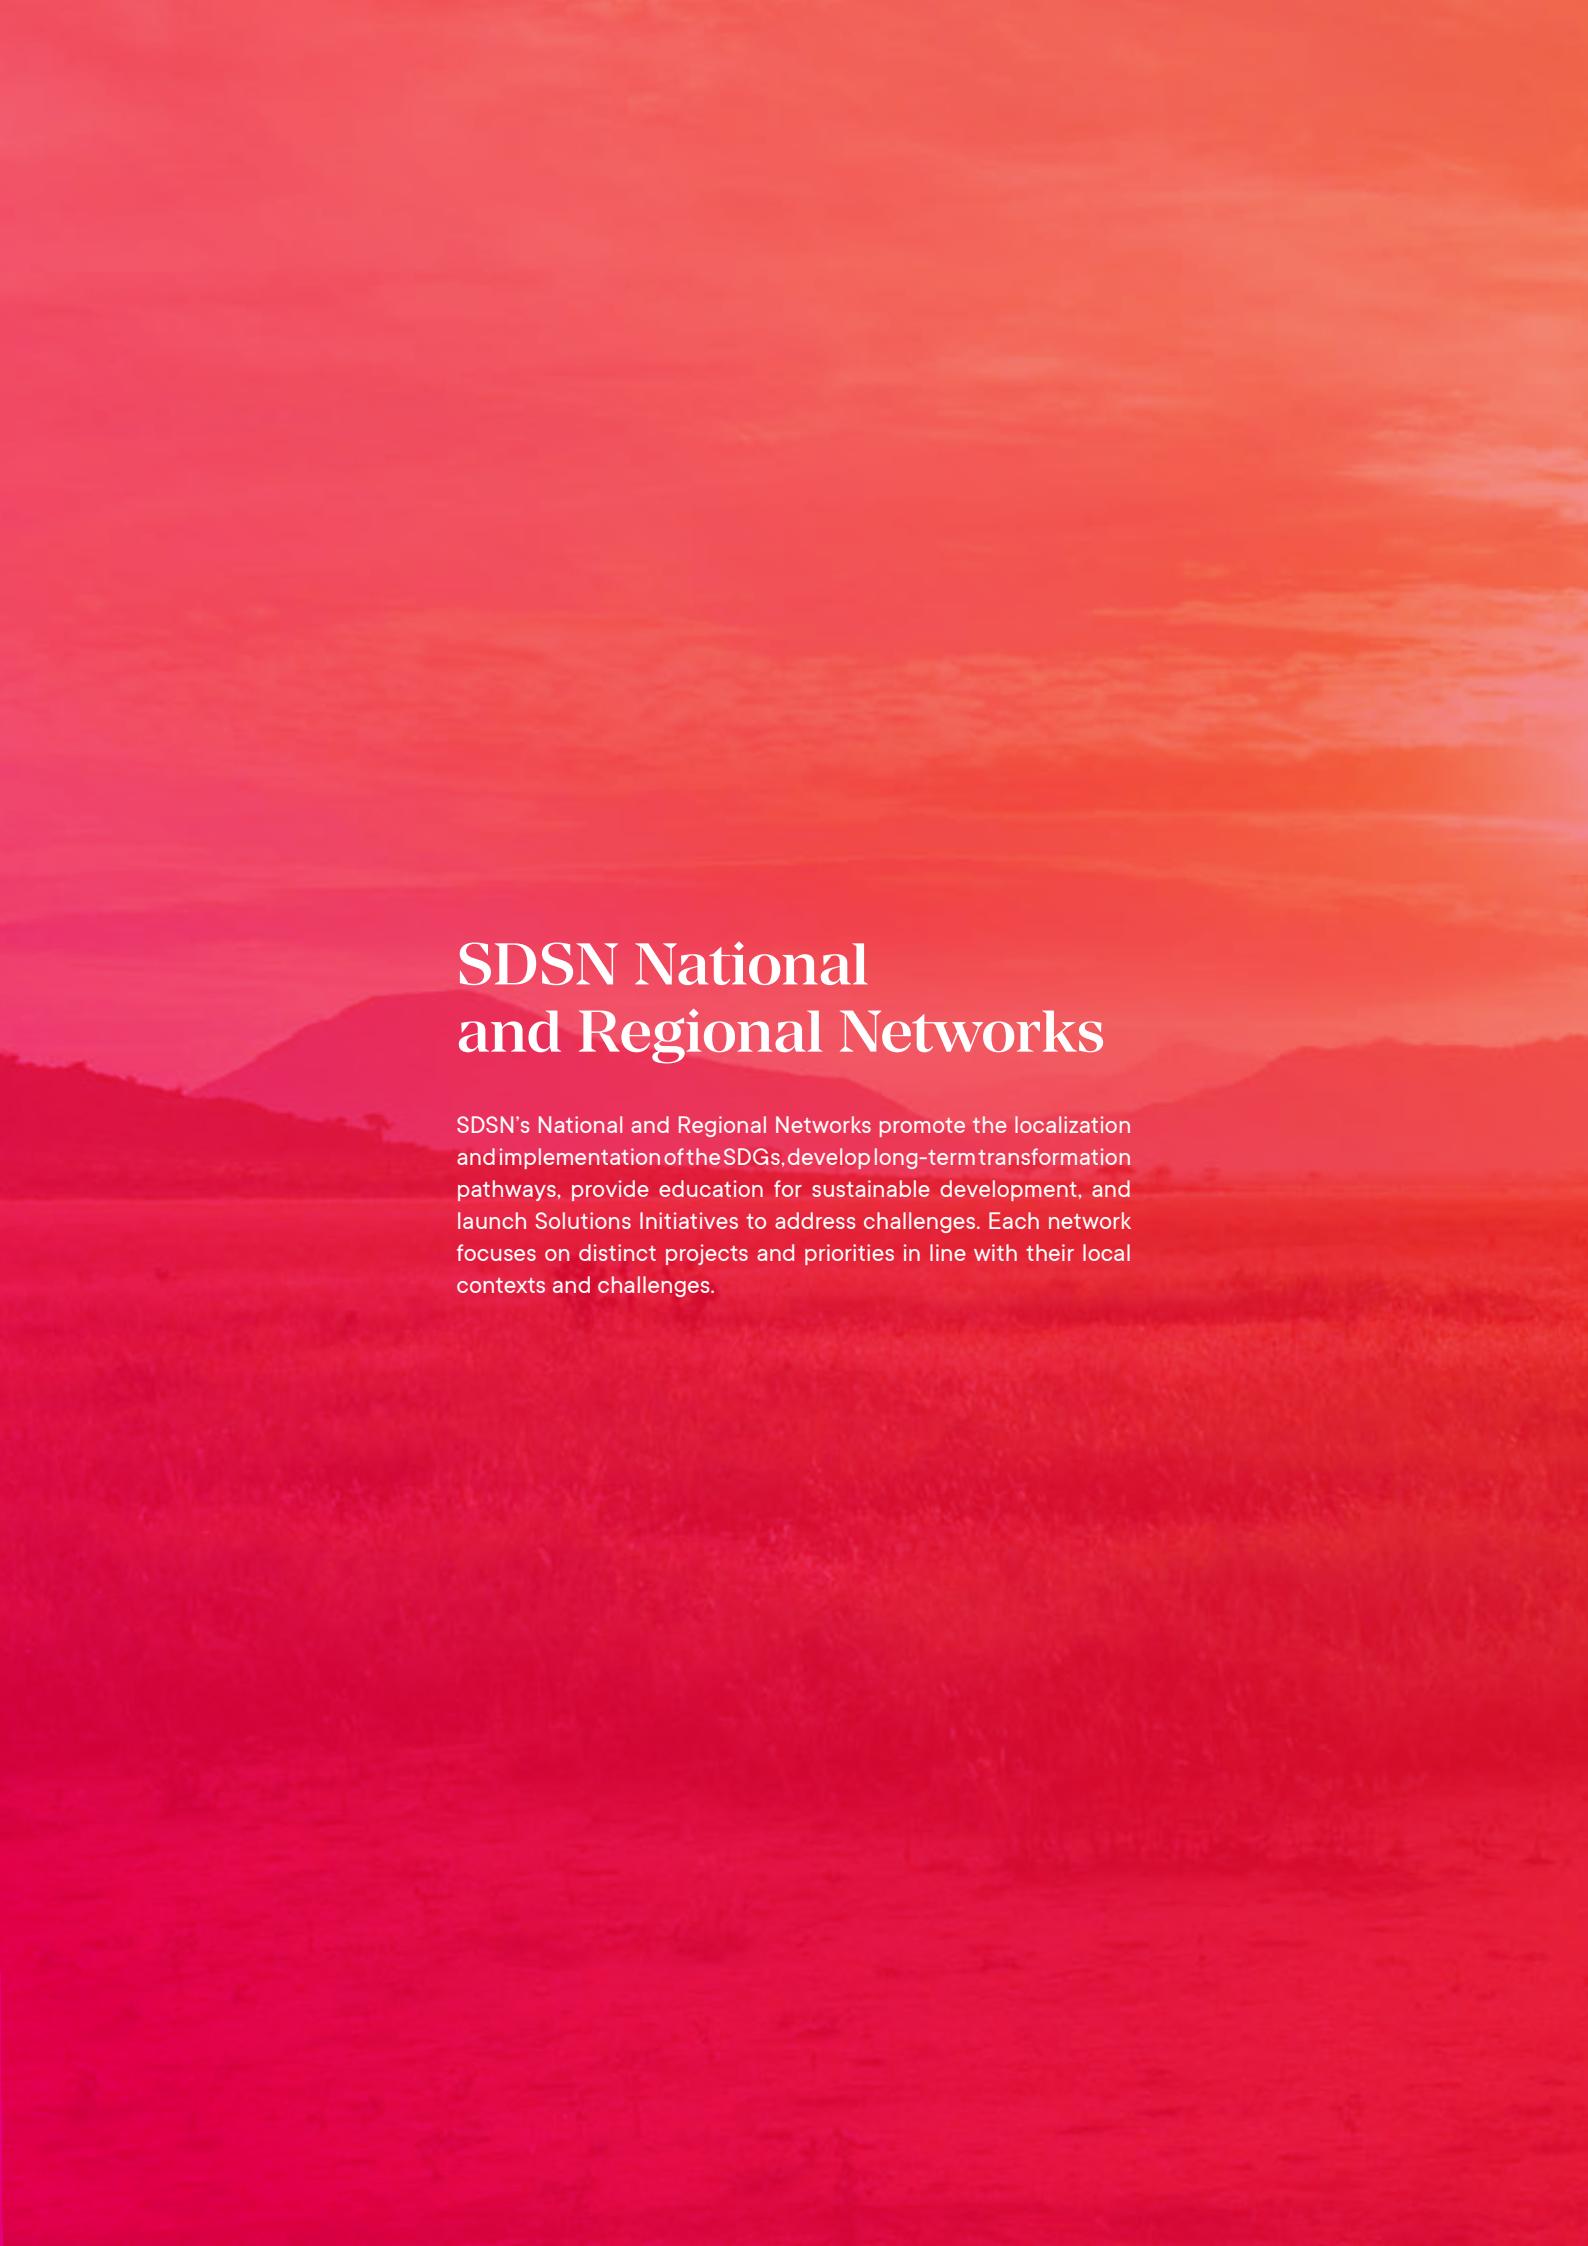

As a member of the Sustainable Development Solutions Network, your institution will be part of a unique network of problem solvers and contribute to practical solutions for sustainable development. Together, we work towards supporting sustainable development in three main areas:

1. Localizing and mobilizing support for the SDGs, including supporting governments in understanding and addressing the challenges of sustainable development;
2. Promoting high-quality education and research collaboration for sustainable development;
3. Vetting and launching solution initiatives, including supporting the preparation of long-term pathways.

SDSN Membership is FREE and open to any university, research institute, research- and science-oriented civil society organizations and foundations, and other institutions that have deep expertise in one or more areas related to sustainable development.

Government entities and private sector institutions/for-profit businesses are not eligible for membership but are welcome to join as partners. Universities can join at the level of the university or an individual department/institute.

Applying for SDSN membership is simple – the online membership application form is on our website and is available in English, French, Portuguese, Russian, and Spanish: www.unsdsn.org/join-the-sdsn

SDSN National and Regional Networks

SDSN's National and Regional Networks promote the localization and implementation of the SDGs, develop long-term transformation pathways, provide education for sustainable development, and launch Solutions Initiatives to address challenges. Each network focuses on distinct projects and priorities in line with their local contexts and challenges.

A photograph of a savanna landscape at sunset. A large, gnarled acacia tree stands prominently in the foreground on the left. The sky is filled with warm, orange and yellow hues from the setting sun, with some wispy clouds. In the background, there are rolling hills or mountains. The overall atmosphere is serene and evocative.

COVID-19 & SUSTAINABLE RECOVERY

The University of Rwanda, which hosts the SDSN Great Lakes, entered into collaboration with the Kreditanstalt Fur Wirtschaft (KFW) towards skills enhancement to address current challenges related to Supply Chain Management for vaccines and other health commodities through incremental capacity improvements. This is in line with the University's effort to play a critical role in training people who will be supporting vaccine manufacturing not only in Rwanda but also throughout the entire region of the Great Lakes.

YOUTH

During a one-week educational program from 6–10 December 2021, 20 Rwandan students from different higher education institutions learned to build innovative and sustainable digital solutions, for some of the most pressing challenges in their communities. The programme was hosted for the third time by Home Association, in partnership with the University of Rwanda and SDSN Great Lakes Youth.

Group Photo of Participants to SDG Summer School

University of Rwanda-College of Business and Economics

The College of Business and Economics (CBE) is one of the six colleges that compose the University of Rwanda (UR), the largest public university in the country. The UR's vision is to be a leading university that develops highly enterprising graduates prepared and dedicated to building a more just and sustainable society locally, nationally, and globally with appropriate innovations that advance the quality of life. The UR's mission is to support the development of Rwanda by discovering and advancing knowledge and being committed to the highest standards of academic excellence, where students are prepared for lives of service, and leadership, transforming communities through finding solutions.

SDSN Kenya mobilized 6 universities to write and publish 5 scholarly papers on the status of the SDG implementation in a peer reviewed journal

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN Kenya conducted a survey targeting all chartered universities in Kenya and disseminated the findings to stakeholders for necessary action. The study reached out to respondents from 20 Universities in Kenya with up to 90 percent of respondents hailing from public universities. Results of the survey indicated low levels of SDGs awareness in Kenyan Universities with only less than 40% of respondents expressing full understanding about SDGs. The study suggested strategies to raise the level of SDG awareness in Kenyan Universities.

Moi University

Moi University is a public university located in the town of Eldoret in western Kenya. It was established as the second university in Kenya by an Act of Parliament, the Moi University Act of 1984. The University is working through the Center for Public Sector Reforms (CPSR), a think tank hosted by the Department of Political Science, to offer first hand theoretical research; advocacy and capacity building, all geared to contribute towards boosting oversight and good governance of the public sector.

University of Nairobi

The University of Nairobi, established by Act of Parliament Cap 210 of the Laws of Kenya, is the pioneer institution of University education in Kenya and the region. The only institution of higher learning in Kenya for a long time, the University of Nairobi responded to the national, regional and Africa's training needs by developing strong, diversified academic programmes and specializations in sciences, applied sciences, technology, humanities, social sciences, and arts.

FLAGSHIP INITIATIVE

The network developed and launched the SDSN Kenya Digital Spotlight Platform aimed at accelerating the SDGs implementation process by: bridging the gap between science and policy; providing a centralized platform to showcase research findings, application, and demonstration of best practices and innovations. SDSN Kenya envisages that the interactive digital platform will help to fast track ongoing research on various SDGs related topics and share best practices to address practical challenges in Kenya and the world.

Dissemination of Survey Findings in a Workshop

20 Universities participated in an SDGs awareness survey

FLAGSHIP INITIATIVE

SDSN Kenya developed and launched the 'Sustainable Development Goals Journal of Kenya (SDGs-JK)', a biannual international peer reviewed open source journal seeking to demystify and create awareness on the SDGs in Kenya through scholarly discourse. Informed by timely data and analysis of local, national, and global trends in the implementation of the SDGs. The scope of the SDSN-K Journal includes analysis of the interdisciplinary and multi-disciplinary issues that have an impact on the implementation of SDGs in Kenya.

University of Ibadan

The University of Ibadan's Centre for Sustainable Development (CESDEV) was established in 2010 as a demonstration of the University's commitment to sustainable development. It was based on the need to provide an intellectual platform for identification of issues germane to sustainable development, to critically analyse them, and provide leadership in finding enduring solutions that will enhance sustainable development. The University of Ibadan is a public research university in Nigeria. The University was founded in 1948 as University College Ibadan, and it became an independent university in 1963. It is the oldest degree-awarding institution in Nigeria.

EDUCATION FOR THE SDGS

SDSN Nigeria engaged with the Office of the Senior Special Assistant to the President on the SDGs. A joint committee comprising representatives of both organisations have since been holding virtual meetings on a monthly basis. The focus has been on developing SDGs curriculum for the basic education system in Nigeria. This is in addition to jointly working on establishing a think-tank group for setting up the FABLE country team in Nigeria.

Strategic partnership
with the Office of the Senior Special Assistant to the President on the SDGs

SOLUTIONS INITIATIVE

SDSN Nigeria strengthened its collaborations with development partners to support the implementation of the SDGs in Nigeria. The first collaboration was in ICLAIM's call concerning the project 'Innovative Solutions for Reducing Inequalities and Inclusive COVID-19 Recovery'. Alongside SDSN Greece, two additional proposals were submitted on Renewable Energy in Africa (Water-Energy-Food Nexus) and Wellness as it relates to the SDGs.

Submitted joint proposals

SDSN Sahel

HOSTED BY:

Alioune Diop University

Dakar, Senegal

sahel.unsdsn.org

SDSN SAHEL

Visit of the UN Secretary General Antonio Guterres to Senegal / UN Women Yulia Panewina

YOUTH

The New strategy of SDSN Sahel raises awareness of the SDGs at the university level as well as at the local government level through the youth. Therefore, SDSN Sahel started to establish an inclusive framework with SDSN Youth Sahel and other entities such as Youthconnekt Africa and the African Renaissance and Diaspora Network (ARDN).

FOCUS ON SDG 16

With the Sahel region being affected by insecurity due to terrorist movements and repeated coups, SDSN Sahel has organized a series of meetings with its Leadership Council's Members and other resource persons to collect their opinions and expertise on how to interact with the SDG 16 and the other SDGs, for a better implementation of the 2030 Agenda. SDSN Sahel also plans to set up a working group including the members of different SDSN African networks.

PARTICIPATION IN SDSN INITIATIVES

SDSN Sahel hosts a TReNDS pilot project, Data4Now, in Senegal. An inventory of data and tools of the cadastral sector has been published in partnership with the National Agency of Statistics and Demography (ANSD) of Senegal. [Labo LEIDI, June 2021]

Alioune Diop University

Alioune Diop University of Bambe is the heir to the Regional University Center (CUR) of Bambe, which was created in 2004. In Senegal and in the sub-region, the Alioune Diop University is the only university that develops a Bachelor's or Master's level professional training in Community Health. The UFR is run by a multidisciplinary team of doctors, sociologists, communication specialists, pharmacists, and computer scientists, in an interdisciplinary dynamic. They were appointed the new host of the regional network in June 2022.

33 member institutions
including universities, research institutions and NGOs

Casamance, Sénégal / Eyelit Studio Unsplash

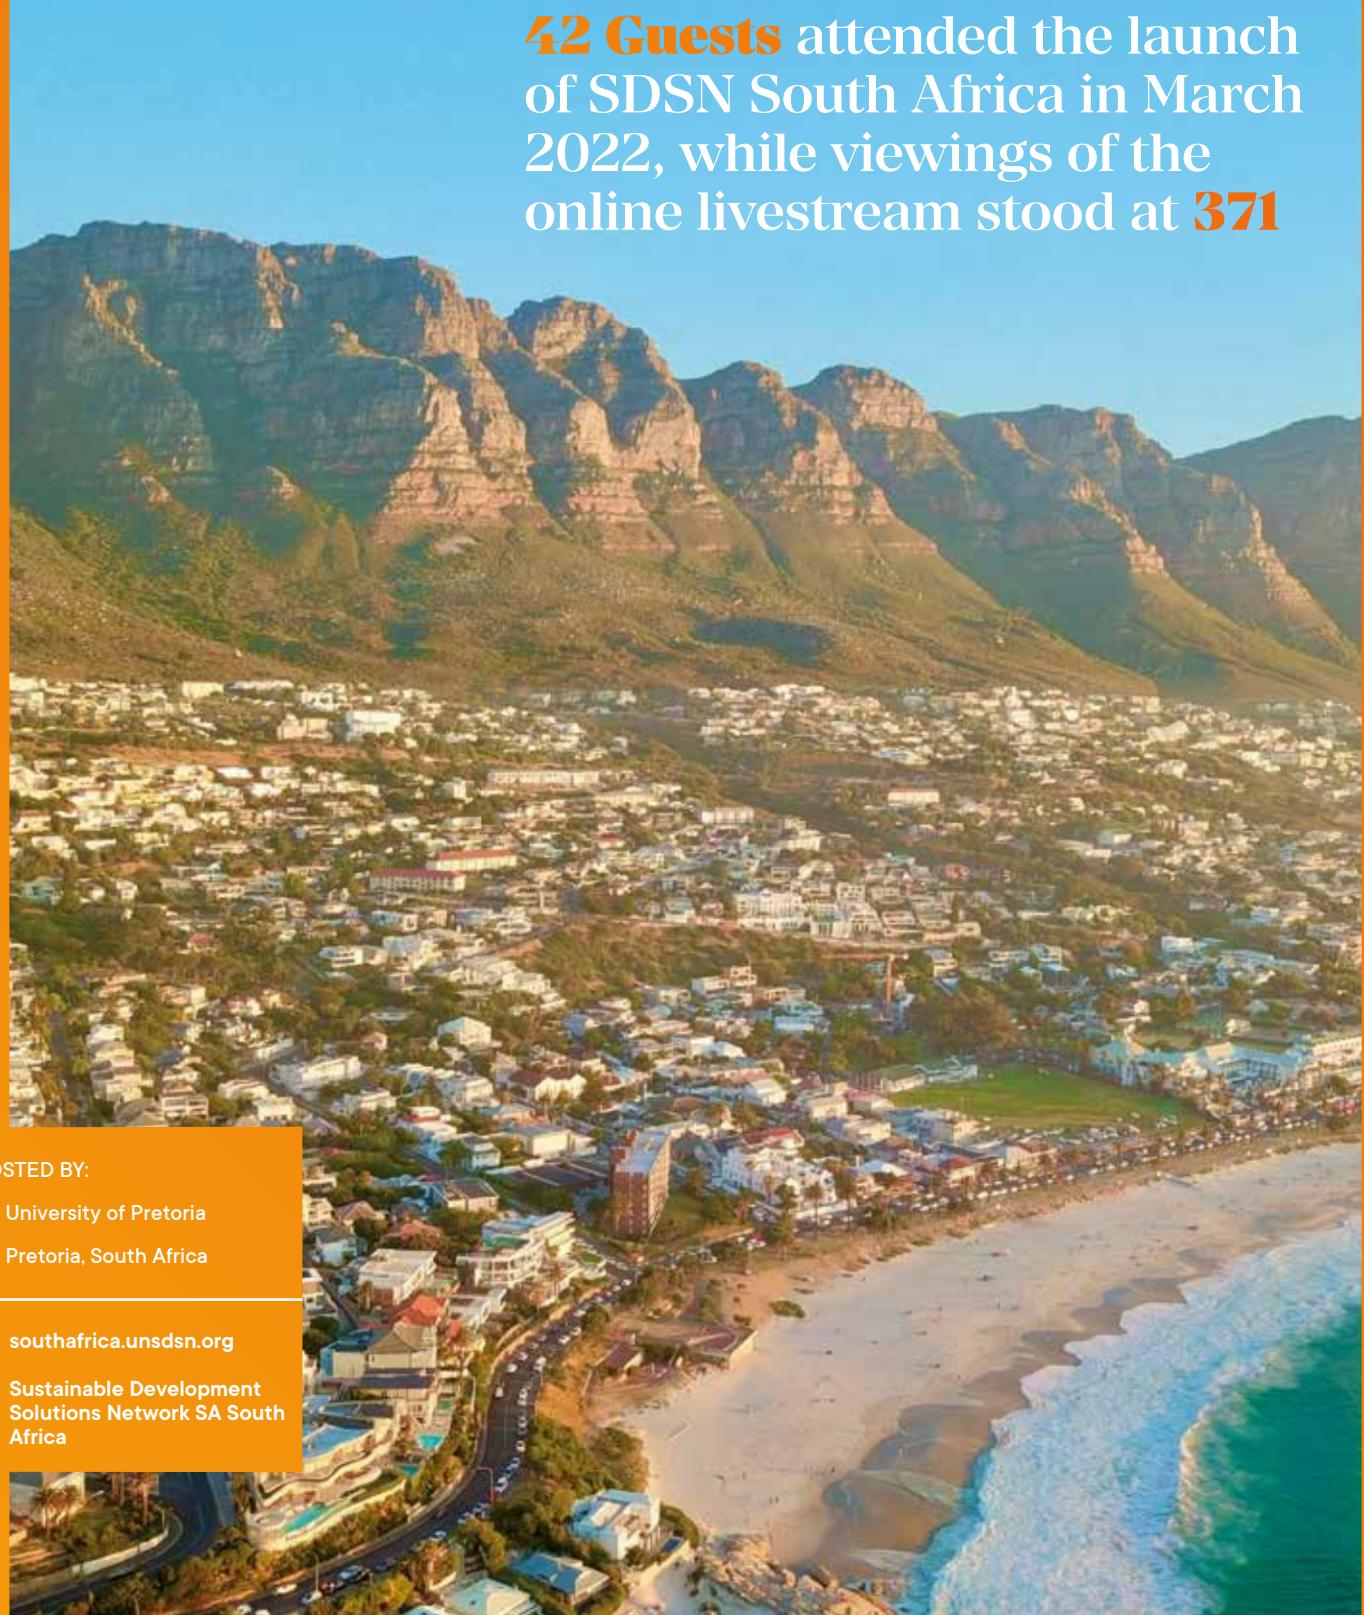

SOLUTIONS INITIATIVE

SDSN Sahel will participate in the GSF 2023. It is within this framework the network will organize in the last quarter of 2022, a fair on sustainable solutions projects. Virtual meetings of network members are organized quarterly, allowing volunteer institutions to present their flagship project and to collect comments and suggestions from the range of expertise of the participants.

SDSN South Africa

42 Guests attended the launch of SDSN South Africa in March 2022, while viewings of the online livestream stood at **371**

HOSTED BY:

Dr Thandi Mgwebi (Deputy Vice-Chancellor: Nelson Mandela University), Prof Peter Lennie (Executive Director: Worldwide Universities Network), Dr Heide Hackmann (Director: Future Africa Institute), and Prof Tawana Kupe (Vice-Chancellor, University of Pretoria) at the launch of SDSN South Africa at the Future Africa Campus, South Africa / SDSN South Africa

EDUCATION FOR THE SDGS

The Central University of Technology, Free State (CUT) appointed SDG champions across the four faculties to drive the integration of targets and the indicators into academic projects. CUT is also working with partners to produce 'The Elgar Companion to the Built Environment and the SDGs'.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

The University of Cape Town hosted the International Summit on the SDGs in Africa in September 2021. The key aim was to mobilise collaborative efforts to accelerate African-led activities in support of achieving the SDGs and the African Union's Agenda 2063. Participants represented a range of stakeholders – from academia to government, to non-profit organisations and broader civil society. It brought together over 1 000 participants from 84 countries across the globe and participants from 40 countries on the continent.

The Albert Luthuli Leadership Institute demonstrated the role of leadership in partnerships for the SDGs to **932 online viewers**

University of Pretoria

SDSN South Africa is hosted by The Albert Luthuli Leadership Institute (ALLI) at the University of Pretoria, which focuses on understanding responsibility in the context of a sustainable future. The University of Pretoria (UP) is one of Africa's top universities and the largest contact university in South Africa. UP produces socially impactful research to find solutions for the world's most pressing issues, while maintaining a high quality of teaching and learning in the classroom, online, and in communities. The University sees itself as an integral part of society, focusing on developing people and creating knowledge to meet current and future societal needs. This purpose is fulfilled through the core functions of research, teaching, learning, and engagement. UP's partnerships for development testify to the University's awareness that its actions today impact on the future economic growth, social development and environmental protection of South Africa and the continent as a whole.

FOCUS ON SDG 17

Leadership as a catalyst and enabler to achieve the SDGs constitutes one of the focus areas of SDSN South Africa, with special emphasis on leadership in multi-stakeholder partnerships that implement the SDGs (in this case mainly SDG 17). A research collaboration between UP and Zeppelin University (Germany) on "Relational Leadership for the SDGs: Perspectives from a Developed and a Developing Economy," produced two research chapters. Postgraduate research resulted in the third chapter on leadership capacities in a Multi-Stakeholder Partnership in Eswatini.

PARTICIPATION IN SDSN INITIATIVES

SDSN-SIEMENS Gamesa: Universities for Goal 13 project brought university students, lecturers, and practitioners together to develop innovative and disruptive climate solutions. Five teams from the University of Pretoria submitted proposals for the first round, ranging from home biogas systems to solar-powered water treatment—both for rural communities. The team that moved to the third and final round is the one with a proposal titled "Design of a novel solar-powered non-thermal plasma technology for water treatment in rural communities."

SDSN Uganda

Gorillas in Bwindi Impenetrable Forest, Uganda / Ylenia Vimercati Molano on Unsplash

SDSN Uganda has 9 member institutions.

Another 4 institutions are in the process of applying to join SDSN

EDUCATION FOR THE SDGS

SDSN Uganda is supporting the incorporation of SDGs in teaching, learning and research in network universities. The network has started preparing the Makerere University Sustainable Development Report (SDR) 2022/2023 to document university's activities, as well as gaps and needs that should be addressed in order to strengthen the university's contribution to the SDGs. This activity has received strong support from the Vice Chancellor of Makerere University. The successes and lessons learned from the project will inform replication in other universities in Uganda.

Participants at SDSN Uganda network meeting (SDSN Uganda)

Makerere University

Makerere University is the leading public university in Uganda, and one of the oldest and most prestigious universities in Africa. The University is made up of 10 constituent Colleges and offers a wide range of disciplines including agriculture, business, economics, education, engineering, medicine, law, and more. Within Makerere University, SDSN Uganda is hosted by the College of Agricultural and Environmental Sciences which is a leading training and research institution in agriculture, environment and natural resource management. The network's Secretariat is in the Makerere University Centre for Climate Change Research and Innovations.

SDG LOCALIZATION

SDSN Uganda is working closely with Uganda government's SDGs Secretariat that is hosted in the office of the Prime Minister. The network participates in the SDG Coordination meetings and supports the governments Voluntary National Review (VNR) stakeholder engagement processes. In 2021 and early 2022, SDSN Uganda participated in the review and validation of the national SDG Progress report 2021.

FLAGSHIP INITIATIVE

GIZ is providing capacity building support for SDSN Uganda through a dedicated consultant. The network's training focuses on leadership, network management, member engagement, communication, and project management. The network will also require capacity building on fundraising.

YOUTH

SDSN Uganda is in advanced stages of establishing an SDSN Youth national network. Youth champions have been selected at Makerere University and Mbarara University of Science and Technology and they are actively mobilizing youth at various universities in the country. Two trainings focused on the role of youth in advancing the SDGs are planned in 2022.

YOUTH

In 2021, SDSN Youth Amazon promoted the planting of seedlings in the Indigenous tribes park in Manaus to commemorate Environment Day. It also hosted social media live sessions with member organizations to disseminate sustainability initiatives and created over 25 educational pieces aligned with the 2030 Agenda. On the climate front, the network held the first remote edition of the Local Conference of Brazilian Youth on Climate Change (LCOY Brazil), which included the participation of 250 youth from across the country and ultimately delivered a collective declaration at the Global Youth Conference in Glasgow during COP26.

5 virtual events held throughout the year, bringing together **1000 participants**

FOCUS ON SPECIFIC SDG

SDG1: No poverty / **SDG5:** Life on land

The network launched the 4th SDSN Amazonia Award for “Solutions for a New Amazon Bioeconomy,” in partnership with the Amazon Bioeconomy Hub and Friends of the Amazon Institute (iAMA). Along with the two partners, the network funded 3 projects developed by network members.

SDG14: Life below water / **SDG15:** Life on land

A group of 24 local entrepreneurs, community leaders, and government authorities from Brazil, Colombia, and Peru participated in a cross-learning exercise to share their experiences on community-based sustainable tourism (CBST) and advance their initiatives for a post-pandemic green recovery.

SDSN Youth delegation at the Conference of the Parties (COP 26), in Glasgow - UK / Foundation For Amazon Sustainability (FAS)

FLAGSHIP INITIATIVE

The Network participated in the Sustainable Weekend Festival Manaus (Fórum da Virada Sustentável Manaus), covering topics including climate change, circular economy, and social justice. The Network spoke about their experiences and contributions at COP26.

SOLUTIONS INITIATIVE

The network launched the 4th SDSN Amazonia Award for “Solutions for a New Amazon Bioeconomy,” in partnership with the Amazon Bioeconomy Hub and Friends of the Amazon Institute (iAMA). Along with the two partners, the network funded 3 projects developed by network members.

Foundation for Amazon Sustainability

Foundation for Amazon Sustainability (FAS) is a Brazilian non-governmental organization that has helped over 25,800 families, benefiting 96,144 people living in 918 communities, villages, and neighbourhoods in 119 Territories (Conservation Units, Indigenous Lands, and Municipalities). FAS, founded in 2008, promotes sustainable development of the Amazon Basin, including environmental conservation, improvements to the quality of life of riverine communities, and the inclusion of stakeholders in decision-making processes.”

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

Latin America is the world's largest food exporting region and an important producer of ecosystem services that shape global weather patterns and climate. Within it, the Andean Region is home to "nutritionally important crop species and superfoods", and "the world's last remaining hotspot for agrobiodiversity" (De Hann, 2019). Hence, SDSN Andes is engaging with knowledge institutions to promote transformative action through food systems for the achievement of the SDGs and the post-pandemic global recovery.

FLAGSHIP INITIATIVE

SDSN Andes publishes a monthly infographic across social media and Mobilize where it shares news on relevant issues taking place in the Andean region in terms of threats, challenges, opportunities, and solutions related to the implementation of Agenda 2030. These include statistics, funding opportunities, and key links for engagement.

Mountain landscape in the upper Calchaqui valley in northern Argentina / Chris Stenger on Unsplash

EDUCATION FOR THE SDGS

Based on data of the SDSN Sustainable Development Reports, the SDSN Andes' Manager has given lectures on the progress of the region towards the SDGs and the challenges brought about by the COVID-19 pandemic. Among them, a lecture for the Latin American Diploma for Sustainable Development in Organizations, organized by the Board of Directors of the Latin American SDG Network and the National Technological University (UTN), Argentina.

Beyond One Foundation

Beyond One Foundation is a global not-for-profit organization which aims to promote and support socio-environmental sustainability to enable a new human renaissance. It envisions a global revitalization driven by science, ethics, global partnerships, and sustainability. Its mission is to empower all stakeholders wanting to be drivers of change towards a new and prosperous human era.

SDSN Bolivia

39 students applied for the first round of ORBITA's program that supports theses on Tourism, Sustainable Development and Gender in Bolivia

HOSTED BY:

EDUCATION FOR THE SDGS

SDSN Bolivia and UPB launched a Diploma Course on the Economics of Sustainable Development with 11 modules (over 200 hours) covering the key challenges and opportunities in each of the SDGs in Bolivia. The course was created to equip participants with knowledge and tools to contribute to the achievement of the Sustainable Development Goals at all levels from individual behavioral changes to influencing public policy. The first edition of the course concluded in April of 2022 with participants from 5 of Bolivia's 9 states.

For every \$1 of public investment in tourism in Bolivia, \$92 of foreign revenue are generated. For agriculture, the corresponding return is \$4

SDSN Bolivia and Fundación IES at the launch of ORBITA, May 2022 / Noelia Chulver

Within 2 months of its launch, ORBITA has signed **15 agreements** with other institutions that are committed to tourism as an engine of sustainable development

Universidad Privada Boliviana (UPB)

Universidad Privada Boliviana (UPB) is one of the top universities in Bolivia and Latin America. According to América Economía, UPB is among the 23 best business schools in Latin America and is the only Bolivian university to be included in this prestigious ranking. Headquartered in Cochabamba, UPB also has a campus and post graduate center in La Paz, and a new campus in Santa Cruz.

Fundación Solidaridad y Desarrollo Productivo Sostenible (SOLYDES)

Fundación SOLYDES is a foundation based in La Paz, which was established in 1987 with the sole purpose of fighting poverty in Bolivia by supporting innovative initiatives. Since then, Fundación SOLYDES has been a central actor in the development and consolidation of the microfinance sector in Bolivia and has strengthened productive entrepreneurship with positive social impacts.

FLAGSHIP INITIATIVE

SDSN Bolivia and Fundación IES launched ORBITA – the Bolivian Observatory for a Sustainable Tourism Industry – in May 2022, as part of the project “Tourism as an Engine of Gender-Inclusive and Sustainable Development.” The project is financed by the Canadian International Development Research Center (IDRC) and seeks to generate knowledge and mobilize key stakeholders at national and local levels to help the predominantly female-led sector recover from the pandemic’s shocks and resume its impressive pre-pandemic growth trajectory.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

In partnership with the Global Living Wage Coalition, SDSN Bolivia works to improve wages and incomes for the poorest workers around the world by calculating, publishing and updating living wage benchmark estimates for selected countries using the Anker Living Wage Methodology.

FLAGSHIP INITIATIVE

SDSN Brazil hosted its 2021 annual conference focused on the theme of Circular Economy: Sustainable Recovery post-pandemic. It facilitated an expansion of dialogues between academia, civil society, and businesses. The event comprised 3 days with 5 Circular Economy sessions, 20 panelists, and 1 discussion about Rio +30, which is the 2022 theme to assess 30 years of work since the Rio 92 convening. 260 people attended the event remotely.

FOCUS ON SDG 12

The network engaged a total of fourteen partners from the private sector and civil society within a thematic group to discuss the transition toward a circular economy. Of these, three academic institutions joined the discussion in order to strengthen the dialogue between science and economic issues.

State of São Paulo, Brazil

Pontifical Catholic University of Rio de Janeiro

Pontifical Catholic University of Rio de Janeiro (PUC-Rio) is a non-profit philanthropic university based on Christian humanistic principles. It is an academic center of excellence in Brazil, welcoming around 16,000 students each year. PUC-Rio values excellence, and is well-ranked both nationally and internationally. It offers scholarships and exchange programs through its numerous partnerships around the world. The Interdisciplinary Center of the Environment (NIMA) supports cooperation to address interdisciplinary socio-environmental issues and hosts the executive secretariat of SDSN Brazil.

16 SDG hubs established with 430 students engaged as members, with a total social media reach of over 4,200 students

FLAGSHIP INITIATIVE

SDSN Canada hosted the Together|Ensemble conference, Canada's largest conversation on the SDGs across sectors. This year's conference featured critical conversations on climate action, systems change in local government, reconcili-action with Indigenous communities, and pathways for progress on the SDGs. The 2022 conference was hosted online and had over 1,200 registrants, featured 30 mainstage speakers, as well as an additional 16 side events organized by leading SDGs organizations from across Canada.

YOUTH

SDSN Canada has supported the establishment of 16 SDG Student Hubs across the network. The hubs organized 56 events during the 2021–2022 academic year, ranging from on-campus SDG activities, networking opportunities, and initiatives with campus administration.

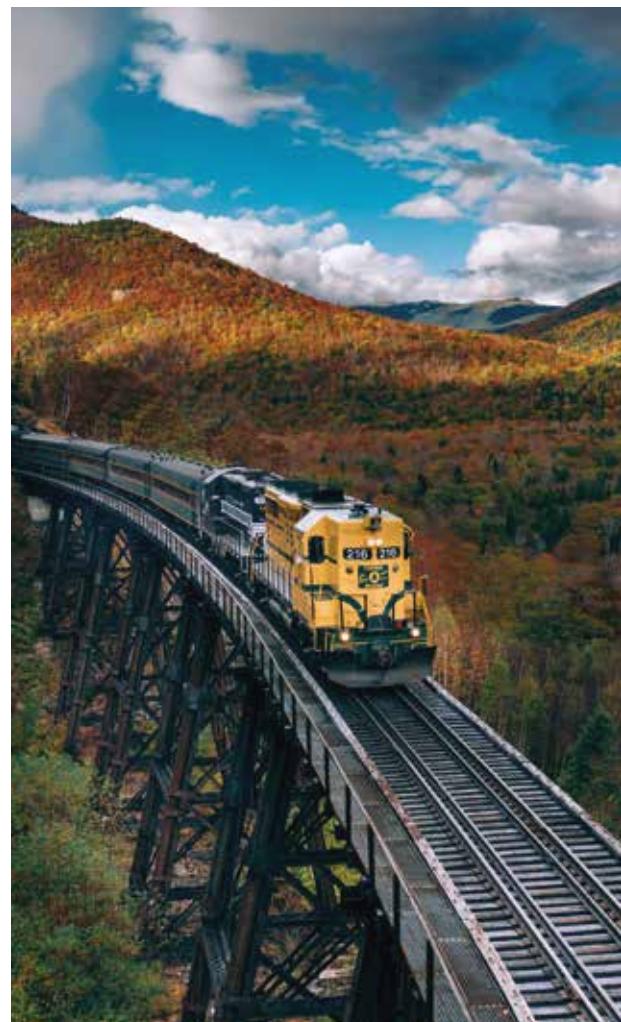

Together|Ensemble conference, photo by SDSN Canada

SDG LOCALIZATION

SDSN Canada co-founded a new Community of Practice for SDG Localization to convene monthly discussions for peer-learning, co-generating knowledge, sharing resources, and discussing practical approaches to accelerate the integration of the SDGs in communities across Canada. In less than a year, the community has grown to more than 170 members representing community groups, government agencies, funding bodies, and academic partners.

Train in wilderness / Martin Sanchez on Unsplash

University of Waterloo

The University of Waterloo is home to Canada's largest Faculty of Environment and has researchers and institutes across campus working on every facet of sustainability and social justice. Consistently ranked Canada's most innovative university, the University of Waterloo is home to advanced research and teaching in science and engineering, mathematics and computer science, health, environment, arts and social sciences.

Engaged over 1,000 people through network webinars and events

Natural environment with the trees at the side of a beach in Baliceaux / Corsel Robertson

If scaled across the region, the Network's solution initiative could remove **over 100,000 metric tons of CO₂ emissions** from the atmosphere yearly

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

The SDSN Caribbean collaborates with institutions around the globe, including a partnership with Columbia University to research how natural disasters affect children, and with Suny University on global health research, leadership and sustainable development.

SOLUTIONS INITIATIVE

Despite challenges presented by the COVID-19 pandemic, the Network continues to implement a solution to convert waste from rum distilleries and sargassum seaweed into Bio-CNG and also solve a number of waste material problems.

Canouan - hut across the sea, connecting back to land / Corsel Robertson

The University of the West Indies

The University of the West Indies (The UWI) has prepared leaders from the Caribbean region and the world for over 70 years. Respected worldwide, it comprises five campuses: Mona in Jamaica, St. Augustine in Trinidad and Tobago, Cave Hill in Barbados, Five Islands in Antigua and Barbuda, and an Open Campus. The UWI, in 2016 established its office of Global Affairs followed by ten (10) global centers to date, with partner universities across the world as part of its robust sustainable development agenda.

PARTICIPATION IN SDSN INITIATIVES

The Network promotes SDG Academy courses, SDSN events, and publications like the Sustainable Development Report to its members and wider network.

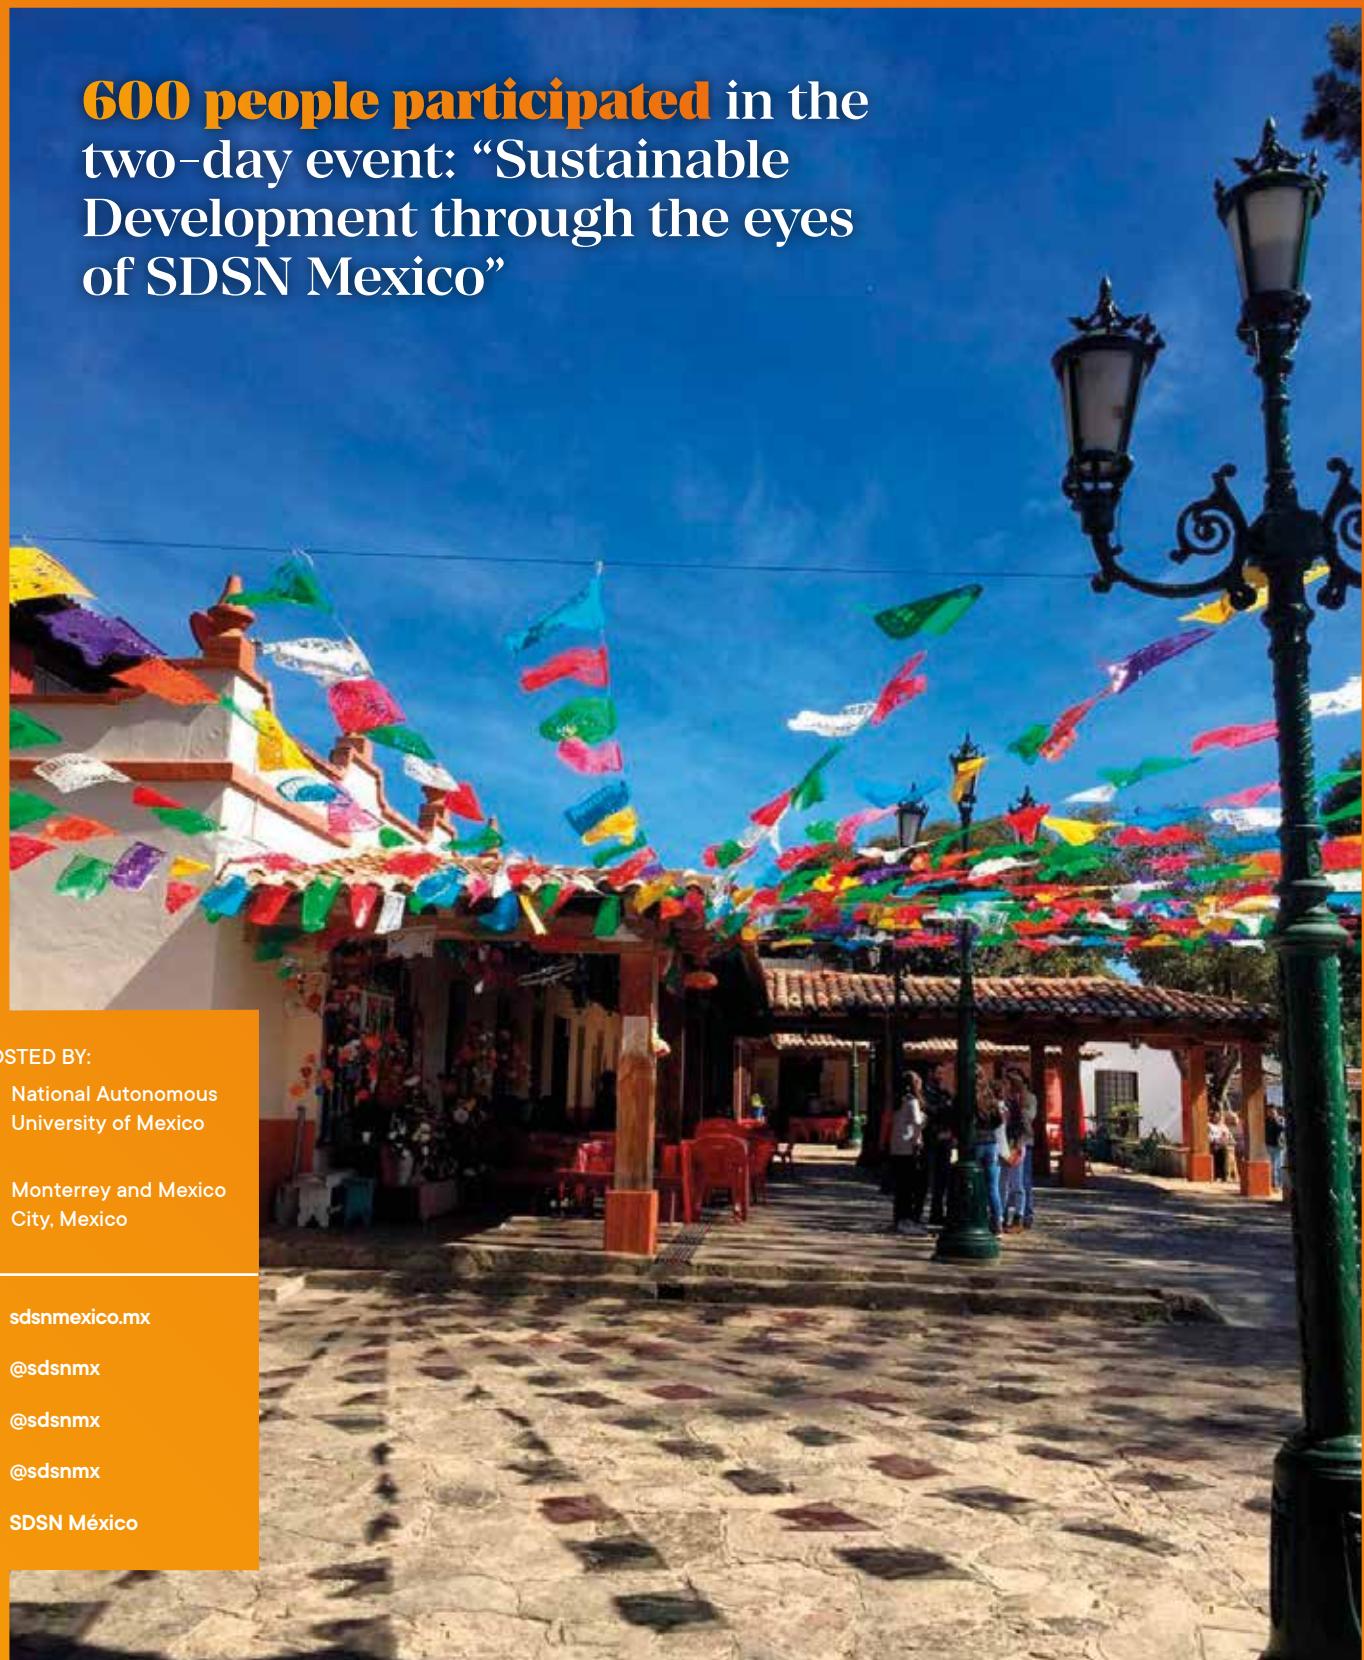

YOUTH

The Network continues to collaborate with SDSN Youth on a range of activities, including events on careers in sustainable development, campaigns to raise awareness and increase engagement on the SDGs, and virtual fora for students to come together on climate action.

SDSN Mexico

San Cristóbal de las Casas, Chiapas / Karina Ruiz

SOLUTIONS INITIATIVE

As of October 2021, SDSN Mexico is part of a multi-stakeholder collaboration with the Ministry of Economy and GIZ Mexico. By having local governments explain their challenges, this initiative seeks to find solutions through the participation of public, private and social sectors. 2030 Solutions is actively working with 25 alliances, each of which involves local governments, solutions' leaders and supporting organizations. SDSN Mexico is also analyzing 250 local needs so that they can be mapped and later presented to specialists, primarily in academia.

FOCUS ON SDG 3

SDSN Mexico also focused on SDG 3. In collaboration with the Institute of Social Research, SDSN Mexico received a grant from GIZ, promoted by SDSN Global, to develop a methodology to improve homeless persons' access to basic healthcare. Open Door Clinic integrates and trains undergraduate students, and hopes to actively involve public officials and agencies to map, tackle and eventually create public policies that help reduce homelessness in the Valley of Mexico. A survey of the rate of infection of SARS-CoV-2 is also being conducted to see how this specific group has been affected by the pandemic.

Foro Alianzas / Karina Ruiz

FLAGSHIP INITIATIVE

SDG Experts in Action. With the incorporation of more than 300 specialists from every sector into the "ExpertODS" Initiative last year, SDSN Mexico launched an internal call to receive transdisciplinary project proposals from the specialists. After multiple workshops, presentations and peer reviewed proposals, 16 Actions Groups were created. Each Action Group has more than one ExpertODS, defined tasks and activities, a badge recognition for participants, and works towards at least one SDG.

FOCUS ON SDG 17

SDSN Mexico focused its work on SDG 17 with the following activities. The Network worked with the Organization of Ibero-American States for Education, Science and Culture (OEI) in their annual meeting of Researchers of Latin America and promoted various solutions. The network also maintained a strong relationship with the National Congress, becoming a key promoter of the 2030 Legislative Strategy. Finally, SDSN Mexico actively participated in the "Alliances Forum," a multi-stakeholder event organized by the UN Office in Mexico to promote a partnerships and innovations platform for sustainable territorial development and to advance public policies focused on specific local sustainable development actions.

SDSN Mexico has reached **40,000 followers on Facebook, 2,000 followers on LinkedIn and 2,000 followers on Instagram**

Tecnológico de Monterrey

Tecnológico de Monterrey is a private university system founded in 1943 in Monterrey, Mexico. It has 26 campuses across 25 cities in the country, and 18 liaison offices in 15 countries. Its academic programs are recognized by international accreditation agencies, and its research approaches are pursued for international collaborations based on "knowledge-driven creation" and "society-driven innovation."

Universidad Nacional Autónoma de México (UNAM)

Universidad Nacional Autónoma de México (UNAM) was founded in 1551 and is the largest and most important public university in Mexico and Ibero-America. The fundamental aim of UNAM is to serve both the country and humanity, to train professionals, to organize and carry out research, mainly on national issues, and to offer society broad cultural benefits.

SDSN United States

Over the last year, SDSN USA has held 24 events with over **550 unique attendees**

EDUCATION FOR THE SDGS

Based on interest by SDSN USA member institutions in education and curriculum for sustainable development, in May 2022 SDSN USA launched a new working group to localize Mission 4.7 to the US. The initiative will build a community to promote SDGs in Education for K-12 formal, non-formal and informal facilitators in the United States.

Between July 2021 and June 2022, SDSN USA's audience has had a **35% increase in newsletter subscribers, a **70% increase** in LinkedIn followers, and a **34% increase** in Twitter followers**

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN USA convenes network members regularly for networking opportunities, including monthly networking events, such as a SDG Localization networking meeting with 90+ participants focusing on tracking the SDGs regionally and incorporating the SDGs in community projects; and a Network Update meeting with participants joining from 55+ institutions from 22 states.

**A POOR PEOPLE'S PANDEMIC REPORT:
Mapping the Intersections of
Poverty, Race and COVID-19**
APRIL 2022

A Poor People's Pandemic Report: Mapping the Intersections of Poverty, Race and COVID-19

FLAGSHIP INITIATIVE

In November 2021, SDSN USA released the Sustainable Development Report of the United States 2021, SDSN's second report ranking the US states on their progress towards the SDGs. The report included a review of equity and access across the goals through the inclusion of a Leave No One Behind (LNOB) Index and revealed that no US state is on track to achieve the SDGs by 2030.

Between July 2021 and June 2022, SDSN USA welcomed **39 new members from 22 US States and territories**

COVID-19 & SUSTAINABLE RECOVERY

SDSN partnered with the Poor People's Campaign on Mapping the Intersections of Poverty, Race, and COVID-19: A Poor People's Pandemic Report. The report connects data about COVID-19 deaths at the county level to other demographic characteristics to illustrate the unequal burden of the pandemic on communities based on race and economic status. The unprecedented and revealing findings of the report were shared widely by US news outlets and across social media.

The network shares **over 30 tips on how to improve youth climate campaigns** in its How To guide

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

As part of its ongoing aim to inspire and empower the higher education sector to engage with the SDGs, the network helped organize a global call for case studies on accelerating education for the SDGs. Regionally, the network continued the SDGs forum series with Australasian Campuses Towards Sustainability (ACTS), including a 2nd regional forum with PRME on mainstreaming education for the SDGs in the region. The network also hosted a breakout session on education for the SDGs as part of SDSN's Asia Pacific University Presidents meeting.

SOLUTIONS INITIATIVE

SDSN AusNZPac member ClimateWorks Centre released a report "The Agenda for Decarbonizing ASEAN" as part of Phase 1 of SDSN's ASEAN Green Futures project, which aims to demonstrate how sustainable, decarbonised economies offer enhanced economic development and more resilient futures for the region.

University SDG Reports: What is (current) best practice?

COVID-19 & SUSTAINABLE RECOVERY

IPAG, in partnership with the International Development Research Centre (IDRC), Canada developed the Digital KICK (Knowledge Information Content Kiosk). Digital KICK was able to raise awareness among the South Asian population on several topics related to COVID-19 and the SDGs such as increased gender violence, immunity boosters, the importance of mental health, healthy dietary habits, and waste management. The project is equipped with interactive audio visuals on key areas related to SDGs 2,3,4,5,8,11 and 12.

There are over **60,000 students** across SDSN member institutions in Bangladesh

Hathirjheel, Dhaka City / Salman Preeom, Unsplash

Institute for Policy, Advocacy and Governance (IPAG)

The Institute for Policy, Advocacy, and Governance (IPAG) is an independent, international think tank with a focus on economic development & trade, international relations & strategic affairs, regional cooperation & integration, migration and resettlement, power & energy, sustainable development & green growth, and governance & leadership. As a proactive 'Do' & 'Think' Tank, IPAG emphasizes evidence-based policy research with a focus on providing solutions that effectively respond to real-life problems and challenges.

University of Dhaka (DU)

The University of Dhaka is the premier educational institute in the country which boasts a prolific research portfolio that includes the best of faculties of the country in Sciences, Arts, Social Sciences, Law, Business, Pharmacy, Engineering, and many other areas. Altogether, Dhaka University currently has 83 Departments and 12 Institutes with 37,000 students and 1,992 teachers. The university coordinates its research activities through its 60 research centers. In terms of research collaboration, the University of Dhaka has consistently held the top position among all Bangladeshi universities.

As a newer network, SDSN Bangladesh already boasts membership of **3 research institutions, 6 universities, and 7 NGOs**

FLAGSHIP INITIATIVE

For T20 Italy presidency, the network's Chair, Prof. Syed Munir Khasru from IPAG led a Policy Brief on "Paradigm Shift in Development Strategy in the Digital Age". IPAG also led three policy briefs for the Global Solutions Initiative on the effects of COVID-19 on gender and children, mitigating the digital divide in e-learning, and governance realignment in the Global South.

PARTICIPATION IN SDSN INITIATIVES

IPAG published a paper on "Digital Transformation in Southeast Asia during the Pandemic: Enabling Transformation or Exacerbating Inequality?" for the International Conference on Sustainable Development (ICSD) held in September 2021.

Hong Kong

FLAGSHIP INITIATIVE

In contribution to SDG12 Responsible Consumption and Production, SDSN Hong Kong launched 'The Jockey Club Sustainable Campus Consumer Programme' in October 2021. The Programme brings about a series of campus environmental improvement and education initiatives for all 8 government-funded universities in Hong Kong. It is expected to drive behavioural changes and reduce 280,000 pieces of disposable containers and 5% of campus energy and water consumption in 3 years.

FOCUS ON SDG 3

SDG3 is one of the five SDSN Hong Kong's strategic priorities. In December 2021, supported by SDSN Thematic Network – Health for All, the CUHK Institute of Health Equity hosted a virtual forum, 'Universal Health Coverage and Health Equity in Hong Kong'. The forum explored how UHC can contribute to an equitable society and discussed the barriers and solutions from a cross-country perspective, focusing on the health equity situation in Hong Kong.

The Jockey Club Digital Support Project for the Elderly Project provided LeaveHomeSafe compatible smartphones, together with 12-month free basic mobile service to 20,000+ underprivileged elderly

30% increase in membership since June 2021

EDUCATION FOR THE SDGS

SDSN Hong Kong facilitated the collaboration between SDSN's Global Schools Program (GSP) and CUHK's Jockey Club 'Sports without Limits' Youth Empowerment Programme that offers eight free online professional training courses under GSP to worldwide educators and students on adapted physical activity (APA). More than 250 local and international educators have enrolled in the first two courses in the initial phase.

Rising Seas, Rising Resilience' exhibition of the Jockey Club Museum of Climate Change, The Chinese University of Hong Kong

More than 1,700 participants have visited the 'Rising Seas, Rising Resilience' exhibition of the Jockey Club Museum of Climate Change since April 2022

The Hong Kong Jockey Club Charities Trust

The Hong Kong Jockey Club Charities Trust (HKJCCT) was founded in 1884. The Hong Kong Jockey Club is a world-class racing club that acts continuously for the betterment of our society. The Club has a unique integrated business model, comprising racing and racecourse entertainment, a membership club, responsible sports wagering and lottery, and charity and community contribution. The Club is Hong Kong's largest single taxpayer and one of the city's major employers. Its Charities Trust is also one of the world's top ten charity donors and its supported projects covered all 17 SDGs.

The Chinese University of Hong Kong

The Chinese University of Hong Kong (CUHK) Founded in 1963, CUHK is a forward-looking comprehensive research university with a global vision and a mission to combine tradition with modernity, and to bring together China and the West. Dedicated to research and education excellence as well as the advancement of sustainable development, the University houses the world's first climate change museum, the Jockey Club Museum of Climate Change, and several vibrant interdisciplinary research centres, including the Institute of Environment, Energy and Sustainability, Institute of Future Cities, and the Institute of Health Equity.

In 2021, the network co-hosted 3 webinars and 2 trainings with **500+ participants** in attendance

Universitas Indonesia

Universitas Indonesia (UI) is known as a modern and green campus consisting of 320 hectares with 6 natural lakes. UI was initially established in 1849 as the Indonesian School of Medicine. Currently, UI has 14 faculties that cover wide arrays of scientific disciplines with 291 degree and non-degree programs of study. Ranked 18th in the Times Higher Education Impact Ranking 2022, UI aims to become an independent university that can resolve national and global challenges, particularly those that impact the Southeast Asia region.

United in Diversity (UID) Foundation

United in Diversity (UID) Foundation is a non-profit organization is a non-profit organization established with Indonesian leaders from business, government, and civil society. Founded in 2003, UID has galvanized leaders from all sectors to come together, start a new dialogue of responsibility, and agree on concrete actions to address the root causes of Indonesia's problems as well as regional and global challenges.

SDSN Indonesia saw an **11.7% increase in membership with 4 new members in 2021**

EDUCATION FOR THE SDGS

The network's former manager facilitated two capacity-building programs entitled "Introduction to the SDGs". The first was initiated by the Center for Indonesia's Medical Student Activities (CIMSA), held on July 30th, 2021, and attended by members of the CIMSA. The second was initiated by Universitas Kristen Krida Wacana and held on October 8th.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

On May 21st, 2021, SDSN Indonesia and The Conversation Indonesia conducted a members-only webinar on "Why Science Communication is Important?" to introduce the media platform and invite members to exchange knowledge on research findings with a broader audience. Six member institutions attended the webinar and expressed interest in participating in future capacity building programs on science communication. Specifically, in writing popular articles for their academic research.

4 Japanese universities participated in SDSN Asia Pacific University Presidents Meeting

PARTICIPATION IN SDSN INITIATIVES

The SDSN University Presidents Meeting for Universities in the Asia-Pacific Region, a forum for discussion on achieving the SDGs, was held in December 2021. Four Japanese universities attended the meeting: the University of Tokyo, Hiroshima University, Okayama University, and Keio University.

FLAGSHIP INITIATIVE

xSDG Laboratory conducts research projects to solve various social issues from the perspective of the SDGs in collaboration with member companies and local governments. In response to the global outbreak of coronavirus in 2020, they held discussions with member companies, local governments, and others to discuss the post-COVID society and 12 key strategies to achieve the SDGs.

Prof. Kanie, the Chair of SDSN Japan, discussing SDG actions for transformative change / Credits: Japan SDGs Action Forum Website

Published “**12 key strategies** to achieve the SDGs based on the COVID-19 experience: Toward a green and inclusive recovery”

SDG LOCALIZATION

The Japan SDGs Action Promotion Council, led by SDSN Japan Chair, Prof. Norichika Kanie of Keio University, held the “Japan SDGs Action Forum” in March 2022. This forum shared the importance of the leverage points in achieving the SDGs in Japan, based on the global trends indicated in the Global Sustainable Development Report (GSDR) 2022, and discussed the future direction of the SDGs in Japan with various stakeholders. Co-sponsored by the UNDESA, Prof. Kanie and three other independent scientists who write the GSDR took the stage to discuss the actions required of Japan to achieve the SDGs.

xSDG Laboratory of the Keio Research Institute

xSDG Laboratory of the Keio Research Institute at Shonan Fujisawa Campus (SFC) conducts interdisciplinary research on the diverse and complex challenges of the SDGs and shares its findings through publications, websites and public lectures. Working with students as well as researchers, the Laboratory has been carrying out activities across different sectors (industry, administration, academia). These are done in collaboration with business entities, centering on research agendas set jointly by business enterprises and local municipalities.”

YOUTH

SDSN Korea fosters the global citizenship of 1,800 youth activists of SDSN Youth Korea from 84 organizations in 42 universities nationwide through a simulation of international development cooperation. Through a Metaverse platform, youth activists are time-shifted to the future of 2030, when the SDGs were not achieved. They learn about design thinking and problem-solving methodologies and discover various solutions to achieve the SDGs. They are also trained in practical skills for local activities such as planning, branding, and fundraising. So far, a total of 138 activists have been trained.

94 youth innovators participated in the SDG Youth Hackathon and developed **17 solutions with Seoul Metropolitan Government and DangJin Local Government**

2040 Carbon Neutral Campus Debate with 100 Youth Leaders

869 students enrolled in SDG Youth Academy

OJEong Resilience Institute (OJERI) at Korea University

Established in 2014, the OJEong Resilience Institute (OJERI) is the center of the Asia resilience research network. OJERI aims to improve ecological resilience of the humanity and contribute to a sustainable society. OJERI cooperates with the Institute of Environment and Ecology, Environmental GIS/RS Center, Wild Resource Plant Seed Bank, and Korea Biochar Research Center to develop new theories and techniques for estimating quantitatively ecological resilience and analyzing the impact of human activities. Through this research network, OJERI will become a top-level research institute in the field of sustainability.

EDUCATION FOR THE SDGS

SDSN Korea has been operating the SDG Youth Academy (SYA) since 2019, which has succeeded in localization as well as overcoming language barriers. SYA bridges the generational gap and promotes mutual learning by bringing together experts and practitioners of different age groups to discuss the 5 pillars of the SDGs.

94 youth innovators participated in the SDG Youth Hackathon and developed **17 solutions with Seoul Metropolitan Government and DangJin Local Government**

SDG LOCALIZATION

SDSN Korea, together with Korean Association for Sustainable Development, Local Sustainability Alliance of Korea, Korea Local Governments Alliance for Sustainable Development, Korea Business Council for Sustainable Development, and Korea Sustainable Campus Association, launched the 'National Action for Sustainable Development' with partner organizations to promote the nationwide implementation of the SDGs. Together, these organizations urged the National Assembly to enact the Framework Act on Sustainable Development, which it did in December 2021.

SDSN Malaysia

26 subject matter experts from 7 member institutions contributed to the SDG Indicator write-ups in the state-level SDG Monitor

Winner of National Solutions Forum, Powered by RISE / Sunway Group Brand Marketing and Communications

EDUCATION FOR THE SDGS

The secretariat coordinated the translation of SDG Academy material into Bahasa Malaysia. This project involved 41 translators from SDSN member universities, translating 37 modules that total 7 hours of video content. Simultaneously, a glossary of 123 sustainable development terms was also compiled and is available on the SDSN Malaysia website.

Kuala Lumpur / Pixabay

SOLUTIONS INITIATIVE

On April 28, SDSN Malaysia organized its inaugural National Solutions Forum, in partnership with the Sunway Group, the All-Party Parliamentary Group on the SDGs, and a government-linked start-up accelerator, MRANTI. The objective of the Solutions Forum was to drive partnerships for sustainable development solutions at scale. 9 out of 39 solutions providers were showcased at this forum.

PARTICIPATION IN SDSN INITIATIVES

The ASEAN Green Future project has published its country-level reports on the present greenhouse emissions situation. Currently in Phase II, 9 country teams use modelling technology to create various decarbonization roadmaps. Each roadmap will analyze technical feasibility, financial feasibility, socio-economic impact, and carbon footprint.

PARTICIPATION IN SDSN INITIATIVES

A dashboard for state-level assessment of SDG performance has been compiled and published via an ArcGIS-powered website. Having data disaggregated by states will allow targeted research, localized SDG education and data-informed policy responses.

Over 93% increase in Facebook likes and followers over the last year

The Jeffrey Sachs Center on Sustainable Development (JSC) at Sunway University

The Jeffrey Sachs Center on Sustainable Development is a regional center of excellence that advances the achievement of the 17 SDGs in Malaysia and Southeast Asia through education, research, and policy advice. Launched in December 2016, the Center operates out of Sunway University, a leading not-for-profit private university committed to the pursuit of education through scholarship, research, and enterprise. The University is committed to multi-disciplinary research in sustainable development within an urban environment, and promoting health, well-being, and the development of new technologies in addressing some of the world's most pressing problems.

38 sessions held at SDPI's 24th Sustainable Development Conference

FLAGSHIP INITIATIVE

In March 2022, IGHD-AKU hosted a global seminar titled 'Pakistan's Challenges of Climate Change, Health, and Nutrition in the Context of Sustainable Development Goals: Strategies for Change' to commemorate the launch of SDSN Pakistan. The seminar also served to introduce a three-year project called 'Building a Consortium to address Climate Change, Health, and Complex Challenges (CHOICE)'. CHOICE aims to improve health and wellbeing and address inequality in LMICs of South-Central Asia and East Africa. Professor Jeffrey Sachs attended the inaugural session virtually as a keynote speaker.

Lady health worker conducting an awareness session with the women from Hussain Bhanbhro village, Matiari district, Source: AKU Pakistan

Hosted 4 webinars, 2 large-scale conferences, and research programs in partnership with prominent and globally renowned research centres and funding agencies

FOCUS ON SDG 5

With a close focus on SDG 5, IGHD-AKU, in partnership with the University of Oxford is implementing a research and capacity-building program, titled 'Supporting Women in Science' in the LMICs of South-Central Asia and East Africa. The four-year program aims to enhance the future research capacity of early-career women researchers and practitioners, help reduce inequities, and create a platform to advance female scholarly leadership for tomorrow. Supporting Women in Science will prioritize capacity building in reproductive, maternal, fetal, and newborn health and nutrition sciences, climate change, and SDGs.

Food security dashboard, Source: SDPI

COVID-19 & SUSTAINABLE RECOVERY

In the wake of COVID-19, Sustainable Development Policy Institute in partnership with International Development Research Centre and Foreign, Commonwealth and Development Office is developing a food security dashboard to support essential economic activity and protect smaller producers. Through innovative data visualization and real-time reporting on supply-demand and fluctuating prices, the government allocates resources appropriately and ensures food security and accessibility at all times.

Institute for Global Health and Development, Aga Khan University (IGHD-AKU)

The Institute for Global Health and Development is an interdisciplinary, research intensive initiative of the Aga Khan University to tackle major global health and development challenges, including the accomplishment of Sustainable Development Goals and the Paris Agreement on Climate Change. Through the partnerships with sister agencies in the Aga Khan Development Network (AKDN) and beyond, the Institute advances AKU's health sciences leadership in LMICs of Asia and Africa to develop cross-sectoral solutions and coordinated programs to overcome the growing health and health-related challenges.

FOCUS ON SDG 2

Following the UN Food Systems Summit 2021, SDSN Philippines' host institution, AIS, and a network member, Xavier University-Ateneo de Cagayan, organized follow-up webinars focusing on more specific food system issues such as cooperatives and urban farming. These dialogues were organized to address key issues regarding SDG 2.

Building on the series of food systems dialogues, in 2022, together with partners, SDSN Philippines invited the country's senators to share their insights, allowing the public to gain some insight into the government's perspective on SDG 2.

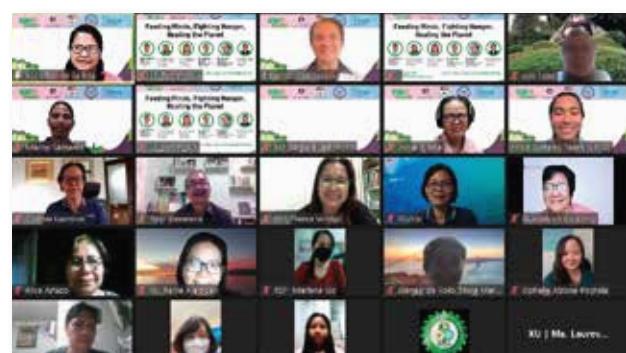

Cebu, Philippines / Hitoshi Namura Unsplash

Over 400 participants joined the food systems webinars in 2022

SDG LOCALIZATION

In November 2021, SDSN Philippines published an article regarding the SDG Index in Business Mirror's Eagle Watch section, the country's second daily business newspaper. This was written in conjunction with the Presidential Elections in 2022 as an opportunity to ensure that the country meets its sustainability and resilience plans.

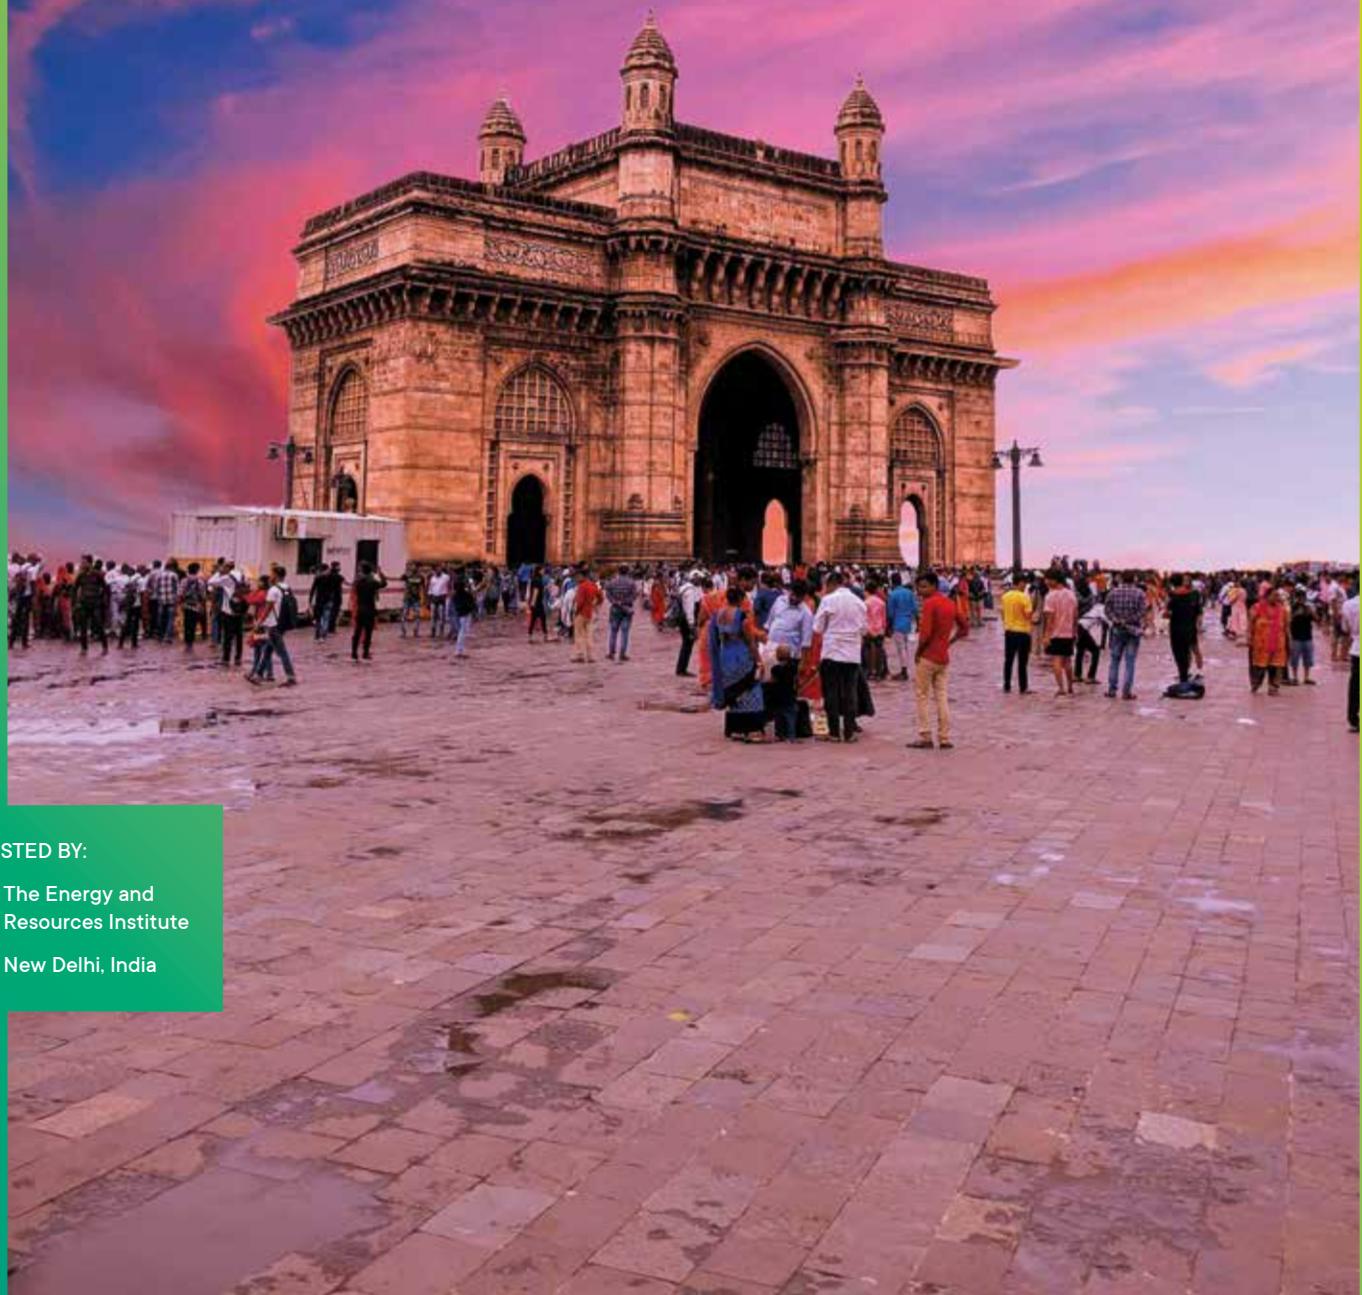

Plenary of one of the Food Systems Webinars

Ateneo Institute of Sustainability (AIS), Ateneo de Manila University

The Ateneo Institute of Sustainability (AIS) was established in April 2013 to be the hub on sustainable development, and the vehicle of the university's environment-development agenda and strategic goals.

HOSTED BY:

The Energy and Resources Institute

New Delhi, India

YOUTH

On World Environment Day 2021, SDSN Youth South Asia launched the second series of GO4Youth - an online exam on the environment and sustainable development for university students. In partnership with POP Movement under the aegis of POP Festival for Youth-led Climate Action, the network organized a session on "Education for Sustainable Development Beyond Boundaries". SDG Student Hub - TERI SAS focused on raising awareness about the SDGs and sustainable living through sustainability talks (S-Talks), School University Network (SUN) Programme, and collaborations with actors such as Mindhouse, India's leading meditation map.

Youth Adda on SDGs in India / UN Women Asia and the Pacific

Forged key partnerships with partners in Bangalore and Sustainable Development Goals Coordination Centre (SDGCC)

Female Indian Farmer Undertaking Sustainable Agricultural Practice / Unsplash

SDG LOCALIZATION

The network formed key partnerships with the Sustainable Development Goals Coordination Centre (SDGCC), jointly established by UNDP India and the Planning, Programme, Monitoring and Statistics Department of the Government of Karnataka, to launch the SDGCC Youth engagement campaign called "SDG For Youth". UNDP served as key support pillars for the youth engagement campaign which allowed for the dissemination of critical knowledge on the aspects of sustainability and socio-economic development.

The Energy and Resources Institute

The SDSN South Asia Network is hosted by The Energy and Resources Institute (TERI) in New Delhi. TERI is an independent, multi-dimensional organisation, with capabilities in research, policy, consultancy and implementation. It has pioneered conservation and action in the energy, environment, climate change, and sustainability space for over four decades. SDSN SA, established in 2014, brings together academic and policy institutions from around the region working on the SDGs. The network has a strong member base of over 50 organizations, including research institutions, universities, and think tanks.

United in Diversity (UID) Foundation

The United in Diversity (UID) forum is a non-profit organization established with Indonesian leaders from business, government, and civil society. Founded in 2003, UID has galvanized leaders from all sectors to come together, start a new dialogue of responsibility, and agree on concrete actions to address the root causes of Indonesia's problems as well as regional and global challenges.

FLAGSHIP INITIATIVE

The host institution launched the Blended Billion for Planetary Health on September 13, 2021. The initiative aims to raise awareness with philanthropic organizations, family and business offices on philanthropic fund as catalytic capital to mobilise private capital for planetary health and SDGs-linked initiatives, and to call for their financial commitment. A 5-year initiative (2021-2026) to target \$1 billion pledge. It is also 1 of 7 initiatives that will be showcased at the 2022 Tri Hita Karana (THK) forum.

Centre for Development and Environment SDG Move (Centre for SDG Research and Support), Faculty of Economics, Thammasat University

Thammasat University, founded in 1934, is known to be one of the leading universities in Thailand. As a co-cost of SDSN Thailand, SDG Move offers SDG-related multidisciplinary policy research and training programmes. It also mobilizes an academic network to promote sustainability transformation in Thailand.

Center for Peace and Conflict Studies (CPCS), Chulalongkorn University

Chulalongkorn University, founded in 1917, is the oldest and one of the most prestigious universities in Thailand. CPCS, under CU, is a distinguished peace studies centre, specialising in peace studies and conflict resolutions. CPCS has been using its expertise to facilitate multi-stakeholder dialogues for the SDGs in Thailand.

Technology and Informatics Institute for Sustainability, National Science and Technology Development Agency (NSTDA)

TIIS, under NSTDA, aims to serve as a central body to house the database for sustainable development as well as to develop a data management system in accordance with the international criteria.

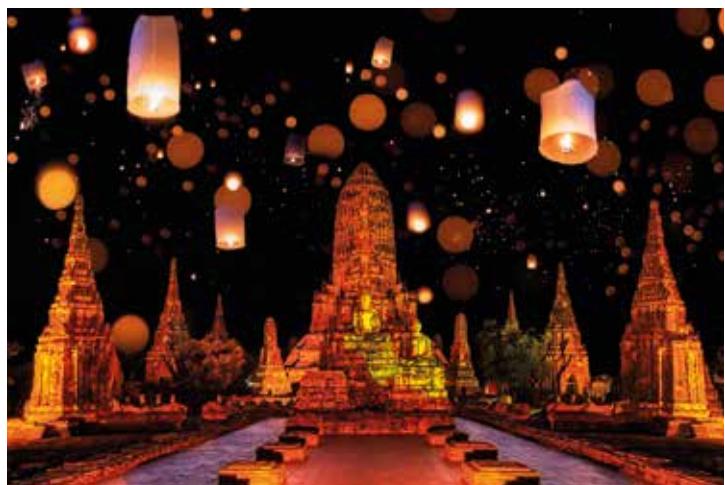

International Health Policy Program (IHPP)

IHPP is a semi-autonomous program conducting research on the national health priorities related to health systems and policy in Thailand. The program aims to improve the national health care systems through generating knowledge and reliable evidence on improving health systems and policy for the public and Thai policymakers.

FLAGSHIP INITIATIVE

SDSN Thailand, by SDG Move and IHPP, launched an SDG knowledge communication platform called SDG Watch project, that publish articles on SDG progress and related policies at all levels as well as SDG actions. The content on this website is created by the SDG Move and IHPP team as well as guest writers from various academic institutions. This project is the only website that regularly publishes SDG content in Thai.

189 experts from 109 organizations including WHO, UNICEF, UNDP and the World Bank took part in TSDF2022

Ayutthaya historical park

SDG LOCALIZATION

SDSN Thailand organized Thailand Sustainable Development Forum 2022, which is a series of 3 multi-stakeholder workshops and consultations. TSDF 2022 invited experts from all sectors to reframe the SDGs using the six transformations framework, investigate the situation of each transformation, and analyze enabling factors for SDG implementation in Thailand. A report from TSDF, which is the first multi-stakeholder SDG report of Thailand, is being consulted by various organizations before being launched.

EDUCATION FOR THE SDGS

In collaboration with Konrad Adenauer Singapore, the network organized the KASpace forum on "Education for Sustainable Development in Thailand". The forum invited experts and organizations working on different aspects of ESD in Thailand, including policy, practices, and enabling environment, to share their lessons learned and obstacles.

Europe & Eurasia

SDSN Belgium

European research project TransformAr has received a budget of € 12 million and includes **22 partners from 11 different countries**

HOSTED BY:

University of Antwerp,
Catholic University of
Louvain

Antwerp and Leuven,
Belgium

sdsnbelgium.be

Leuven, Belgium

EDUCATION FOR THE SDGS

Education4Climate, an initiative supported by The Shift and SDSN Belgium, organized a roundtable with representatives from Belgian universities and university colleges. The roundtable discussed how to make Belgium's higher education programs a key enabler for the carbon neutrality transition, and how to adapt their content to better include all aspects of environmental sustainability.

TransformAr

The Government of Flanders is providing **€15,88 million for the call for projects of the G-STIC Climate Action Programme in 2022**

FOCUS ON SDG 13

SDSN Belgium mainly focused on SDG 13. The University of Antwerp, SDSN Belgium co-host, is the lead coordinator of the major research project TransformAr, funded by the European Commission. The project will create products and services to introduce large-scale transformational adaptation processes in vulnerable regions and communities across Europe. Gathering 22 partners from 11 countries, the project's findings will contribute to the EU's strategy on climate change adaptation.

G-STIC

**CLIMATE ACTION
PROGRAMME**

 **Flanders**
State of the Art

G-STIC Climate Action Programme

SOLUTIONS INITIATIVE

The G-STIC Climate Action Programme, a cooperation between VITO/G-STIC (the prime research and technology organization on cleantech and sustainable development in Belgium), a member and partner of SDSN, and the Flemish Department of Environment, supports developing countries in their fight against climate change. Through a yearly call for projects, the Government of Flanders provides subsidies for demonstration, dissemination & capacity building projects that strengthen the implementation of climate policies, strategies, regulations, and action plans in developing countries.

University of Antwerp

The University of Antwerp is a young, dynamic, and forward thinking institution, and one of the Young Universities for the Future of Europe (YUFE). More than 21,000 students are enrolled, of which 20% are international students. Ecology and sustainable development are some of the frontline research domains. Specifically, SDSN Belgium is hosted by the Institute of Environment and Sustainable Development (IMDO). IMDO offers multidisciplinary research and education programs that aim to support the complex challenges of society, industry, and authorities on sustainability questions.

Catholic University of Louvain

The Catholic University of Louvain (UCLouvain) is Belgium's largest French-speaking university. It welcomes more than 30,000 students in seven locations in Brussels and Wallonia. The university offers courses in all disciplines, from Bachelor's degree to doctoral degree level, as well as many lifelong learning programmes. It is also a pioneer in the creation of massive open online courses (MOOCs), and the first French-speaking university in Europe to offer online courses on the edX platform. UCLouvain is amongst the top 1% universities worldwide.

EDUCATION FOR THE SDGS

Understanding the need to support local communities and to engage more institutions in integrating the SDGs in education, SDSN Black Sea, in cooperation with SDSN Youth Black Sea, have initiated the translation of related guides (e.g. "Accelerating Education for the SDGs in Universities") in the languages covered by the network. The first editions will be in Greek (in cooperation with SDSN Greece) and Georgian (in cooperation with the Ivane Javakhishvili Tbilisi State University and the local SDG Hub). Furthermore, SDSN Black Sea supports projects that work towards SDGs integration in education, such as the EUSTEPs.

Lighthouse in the Danube Delta / Stefan Cosma on Unsplash

Moments from Climathon

SDSN Black Sea saw a **25% increase in its membership** within the period 2021–2022, welcoming new members from Albania and Ukraine

PARTICIPATION IN SDSN INITIATIVES

"Via SDSN Europe, the Black Sea, Greek and Mediterranean SDSNs established the Sustainable Euro-Asian Seas Initiative (SEAS), to accelerate science-driven blue growth and the implementation of Agenda 2030 in the Euro-Asian Seas. The related high-level working group will work on the science-policy interface related to Blue Growth, as well as on producing an annual report."

Aristotle University of Thessaloniki (AUTH)

Aristotle University of Thessaloniki (AUTH) was founded in 1925 and is the largest university in Greece, covering all disciplines, consisting of 11 faculties, and 41 schools. It is widely recognized as a vibrant center of learning which draws its inspiration from a long tradition of academic achievement. It hosts three UNESCO Chairs, including on Education for Human Rights, Democracy and Peace, the International Network of Water-Environment Centers for the Balkans, and the C2c Center for Integrated Water Resources Management.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN Black Sea actively engages with knowledge and research institutions across the region, through the organization of various events. Examples include the "Role of Universities in Solving Complex Challenges Agenda", the "Designing science-based solutions for clean air and safe climate" and the International Conference on "Education for Sustainable Development" at Expo Dubai.

YOUTH

One of the main events co-organized by SDSN Youth Black Sea and the IACES is the Climathon Thessaloniki 2021. Climathons aim to raise climate awareness, disrupt the status quo and rethink the cities we live in and the future we want as citizens, through the active engagement of citizens, as they are organized in cooperation with Municipal authorities. Climathon Thessaloniki 2021 main theme was "Energy Transition: A Pathway to the Future".

Prof. Jeffrey Sachs with members of SDSN Cyprus

FLAGSHIP INITIATIVE

SDSN Cyprus supported the 2021 Conference "Climate Change in the Eastern Mediterranean and Middle East", organised by the Cyprus Institute as part of the Eastern Mediterranean and Middle East Climate Initiative (EMME-CCI). Prof. Jeffrey Sachs participated in the conference, which was a key milestone, since both SDSN Cyprus and the EMME-CCI emerged as a result of his interventions during the EMME Conference in 2018.

Poster of the EMME-CCI conference

The Cyprus Research and Educational Foundation (CREF)

The Cyprus Research and Educational Foundation (CREF) was established in February 2004. CREF is driven by the vision of promoting the advancement of knowledge and its humane and benevolent applications throughout the Eastern Mediterranean. The foundation highlights the role of Cyprus as a gateway of knowledge and innovation and helps the transformation of Cyprus' economy into a knowledge-based economy. To realize its vision and objectives, CREF, created a unique research and education institution, The Cyprus Institute (Cyl), which not only contributes to the knowledge economy of Cyprus, but contributes to the peaceful development of the Eastern Mediterranean and Middle East Region through scientific and technological cooperation. Cyl is international in its membership and partnerships with established world class institutions, and is devoted to the wellbeing of the local, regional, and the international community.

COVID-19 & SUSTAINABLE RECOVERY

Prof. Theodoros Zachariades, a member of the SDSN Cyprus Leadership Council and a founding manager of SDSN Europe, contributed to the national government's "Cyprus COVID-19 Recovery and Resilience plan", focusing in particular on aligning the plans to relevant SDGs.

The Interdisciplinary Centre for Law, Alternative and Innovative Methods (iCLAIM) joined SDSN Cyprus as a partner

SOLUTIONS INITIATIVE

On January 18, SDSN held the Global Solutions Forum alongside the G-STIC in Dubai during the #GlobalGoalsWeek at Expo 2020. Bringing together sustainable development experts from around the world, the event showcased five selected global innovators from SDSN's national and regional networks who presented their breakthrough efforts from Bangladesh, Cyprus, Thailand, Turkey, and Colombia. A winning solution was presented by a team from UCLan Cyprus, an SDSN Cyprus member.

COVID-19 & SUSTAINABLE RECOVERY

SDSN Europe contributed to the 3rd edition of the Europe Sustainable Development Report. With the help of the regional and national SDSN networks, the group conducted a thorough analysis of the Spanish and Italian National Recovery and Resilience Plans (NRRPs) as well as a review of the overall alignment of the NRRPs with the SDGs in nine EU Member States.

2nd report of the European Green Deal Senior Working Group; Cover by Guido Bellini

1,500+ followers on LinkedIn

Created in December 2020, SDSN Europe is a coordination instrument for networks in Europe to catalyze actions relating to EU policies that provide support for a green, digital, job-based and inclusive transformation. Comprised of 15 national and regional networks of universities and knowledge institutions across the continent, SDSN Europe supports and advocates for the alignment of European policies with the SDGs and the Paris Climate Agreement.

FLAGSHIP INITIATIVE

SDSN Senior Working Group on the European Green Deal promoted the findings of its 1st report at the 2021 International Conference on Sustainable Development and the 2021 Zero-Emission Solutions Conference. The group's second report, "Financing the Joint Implementation of the SDGs and the European Green Deal" was introduced at the 2022 UN-ECOSOC Partnership forum, stressing the need for private financial flows to be directed towards sustainable projects and activities.

FLAGSHIP INITIATIVE

The T7 Task-force on international cooperation of which the Co-Chair of SDSN Europe, Adolf Kloke-Lesch, is a member, formulated policy recommendations on strengthening multilateralism and improving global governance for the global common good. SDSN Europe also supported the expert conference entitled "Promoting a green and just recovery: Leveraging the potential of G20 and G7 Cooperation".

Siena International School on Sustainable Development (SISSD); Credit: Guido Bellini - Santa Chiara Lab - University of Siena

EDUCATION FOR THE SDGS

SDSN Europe supported the 4th edition of the Siena International School on Sustainable Development (SISSD). The School addressed a wide audience of academic researchers, project managers and officers in the private and public sector. It provided high-level training and qualification by professors and experts from internationally renowned bodies and institutions. The focus of the School was on the opportunities, solutions, and implications of the decarbonization process in the energy, agri-food, and manufacturing sectors. SDSN Europe co-organized the last lecture of the 2022 SISSD in form of a public event titled "The SDGs in Times of Crises".

HOSTED BY:

CY Cergy Paris Université,
Kedge Business School,
PSL University

 Cergy-Pontoise, Marseille,
and Paris, France

 sdnfrance.com

Paris, France / Unsplash

FLAGSHIP INITIATIVE

SDSN France finalized the Philia 1.0 model, an ecological macroeconomic model with 321 equations to simulate the effects of “green” macroeconomic financing policies on the climate trajectory and the SDGs. This model will allow deepening the results of the research published in the PoCfiN working paper series.

Submitted a **Horizon Europe project** for the development of new indicators and macroeconomic strategies based on biomimicry

CY Cergy Paris Université (UCP)

CY Cergy Paris Université is a French public university and a leading center of teaching and research, which welcomes 17,700 students and 1,500 international students interested in studying abroad. UCP is a cultural, scientific and vocational institution that has decided to put the issues of societal transition at the heart of its priorities and to commit itself more resolutely to an approach of social responsibility and sustainable development.

Kedge Business School

Kedge is a French management school with four campuses in France (Paris, Bordeaux, Marseille and Toulon), and three abroad (two in China, and one in Senegal). KEDGE is recognized as a key player in the field of sustainable development and CSR. It focuses on coherence between research, pedagogy, campus social and environmental management, and governance.

PSL University

PSL is a French collegiate university that was formed in 2010 and is made up of nine member institutions in Paris. PSL offers an education based on research and interdisciplinary instruction, and its 20,000 students have access to a broad range of disciplines in science, engineering, humanities and social science, and the arts. PSL runs cross-cutting flagship programs such as the Scripta Interdisciplinary and Strategic Research Initiative (IRIS), the PSL Mathematics program, and the Q-Life Institute.

EDUCATION FOR THE SDGS

SDSN France has a central focus on sustainable finance and aims to develop and disseminate new knowledge to align education and the functioning of the financial system with the 2030 Agenda. SDSN France submitted the final manuscript of the textbook Ecological Money and Finance. Also, the textbook “Exploring Sustainable Monetary and Financial Systems (Springer Nature)”, to be published in 2023, contains several educational bonuses such as an online SuliTest, test bank and videos of experts posted on the SDG Academy website. A French version will be published the following year by De Boeck.

Team of SDSN Germany

Over 100 participants attended the Extended Steering Committee on climate governance in 2022

FLAGSHIP INITIATIVE

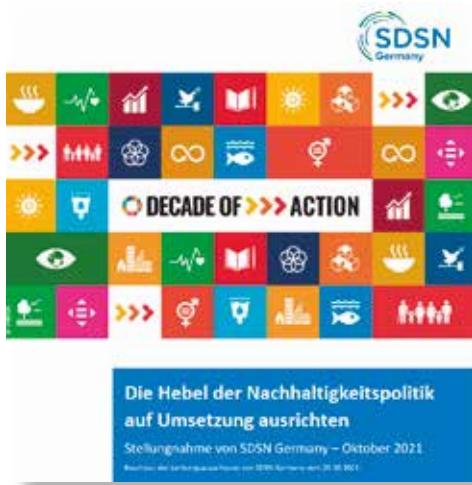

SDSN Germany published specific policy recommendations for the new Federal Government on each of the five levers mentioned in Germany's National Sustainable Development Strategy, e.g. Social Mobilisation and Participation; Finance; Research, Innovation, and Digitization; International Responsibility and Cooperation; and Governance.

FLAGSHIP INITIATIVE

SDSN Germany coordinated a guidance paper on nature-based solutions to climate protection and biodiversity policy. The guidance paper was signed by 320 renowned scientists and several members of scientific advisory boards of the German government. Several recommendations were included in the coalition agreement.

2800 followers reached on social media in 2021. The tweet of the year had 71 likes and was shared 39 times

German Bundestag

PARTICIPATION IN SDSN INITIATIVES

SDSN Germany actively contributed to the Europe Sustainable Development Report 2021 by incorporating its expertise in Germany's Recovery and Resilience Plan and Germany's National Sustainable Development Strategy. Additionally, SDSN Germany engaged with SDSN Europe on a G7/G20 expert conference.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

Several knowledge institutions are members or partners of SDSN Germany. The Secretariat stays in close contact with all of them and has organized events on specific topics related to sustainability, such as climate governance, voluntary carbon markets and socioeconomic participation in the context of the sustainability transformation.

German Institute of Development and Sustainability (IDOS) is one of the leading think tanks for global development and international cooperation worldwide. Founded in 1964, IDOS's work is based on the interplay between research, policy advice, and training. IDOS is committed to building bridges between theory and practice.

EDUCATION FOR THE SDGS

SDSN Greece organized a professional training course on “Implementing the Sustainable Transition: Agenda 2030, the Paris Agreement on Climate Change and the European Green Agreement” which gathered speakers from academia, public institutions, and businesses. Prof. Phoebe Koundouri, co-chair SDSN Greece, is the Scientific Coordinator.

PARTICIPATION IN SDSN INITIATIVES

SDSN Greece in collaboration with RESEES laboratory, AUEB intends to record the contribution of the Athens University of Economics and Business to the Sustainable Development Goals (SDGs) under four pillars : Education, Research, Infrastructure, and Governance and Outreach. The report is expected to be completed by late 2022.

Athens Circular Forum, promotional photo

FLAGSHIP INITIATIVE

The 2021 Sustainability Summit for South East Europe and the Mediterranean has become a seminal platform for sustainability discourse at the regional level with its mobilization of resources. Prominent international business and finance leaders, along with cabinet ministers, academics, and Nobel laureates from around the world, participated in the event.

60% increase in the number of LinkedIn followers

SDG LOCALIZATION

SDSN Greece, in collaboration with SDSN Europe and SDSN Global, has monitored SDG implementation in the 13 administrative Districts of the Greek territory. Regional qualitative and quantitative data have been collected and SDG Indicators have been calculated following the SDSN methodology. The report, with detailed conclusions and recommendations for all Greek regions, was completed in June 2022.

More than 600 people attended the Athens Circular Forum II – Partner Event for Greece in the EU Green Week

Athens University of Economics and Business (AUEB)

In 2021, AUEB replaced the International Centre for Research on the Environment & the Economy (ICRE8) as the hosting institution of the Greek network. AUEB is the oldest university in the field of economics in Greece, and it is rated in the top 2% of European Universities. Among the values of AUEB are: excellence, academic freedom & ethics, innovation, extroversion, and social responsibility, which are in perfect alignment with those of SDSN Greece.

Political Economy of Sustainable Development Lab (PESD)

The PESD Lab of the National and Kapodistrian University of Athens is devoted to the political economy dimension of sustainable development.

ATHENA Research Center

In 2021, AUEB replaced the International Centre for Research on the Environment & the Economy (ICRE8) as the hosting institution of the Greek network. AUEB is the oldest university in the field of economics in Greece, and it is rated in the top 2% of European Universities. AUEB's values include: excellence, academic freedom & ethics, innovation, extroversion, and social responsibility, which are in perfect alignment with those of SDSN Greece.

COVID-19 & SUSTAINABLE RECOVERY

Within the context of the European Week of Regions and Cities 2021, the session "How the EU Cohesion Policy Contributes to the SDGs: Lessons for the COVID-19 Recovery", organized by FEEM and SDSN Italy, aimed to identify answers to the following issues: what is the role of local planning in enabling SDG attainment? What is the impact of EU policies on the larger 2030 Agenda? What is the role of partnerships between local authorities, citizens, and the academic world in the recovery phase?

EDUCATION FOR THE SDGS

Strongly supporting Mission 4.7, SDSN Italia has established a partnership with RUS, the network of sustainable universities in Italy. To strengthen this relationship, they jointly launched the first Italian guide on Agenda 2030 and SDGs called "Agenda 2030 e Obiettivi di Sviluppo Sostenibile: una guida per università e istituti di istruzione superiore." The launch was attended by students, professors, and administrators from over 30 Italian universities.

SDSN SDG Guides for Universities / Credits SDSN Italia

SDG LOCALIZATION

Consistent with the objective of shedding light on targets and indicators of the SDGs at the local level, SDSN Italy presented an update of the SDG Portal for Italy. One new report released by SDSN Italy and FEEM in 2021 assessed the SDG performance in Italy at the sub-national level.

Localizing the Agenda 2030

Fondazione Eni Enrico Mattei

Fondazione Eni Enrico Mattei (FEEM), founded in 1989, is a non-profit, policy-oriented, international research center and think tank. The Foundation produces high-quality, innovative, interdisciplinary research on sustainable development which contributes to the quality of decision-making in public and private spheres. Thanks to its international network, FEEM integrates its activities with those of the best academic institutions and think tanks around the world.

Santa Chiara Lab

The Santa Chiara Lab is the multidisciplinary centre at the University of Siena focused on the support and promotion of research, innovation and teaching. The Santa Chiara Lab is an incubator for many multidisciplinary projects on sustainable development including SDSN Mediterranean, the Partnership for Research and Innovation in the Mediterranean Area (PRIMA) and the PRIMA Observatory on Innovation."

370 participants from 60 countries attended the 4th Siena International School on Sustainable Development

Mykonos, Greece / Unsplash

SDG LOCALIZATION

The 2021 Sustainable Development in the Mediterranean Report focuses on 24 Mediterranean countries hosting a population of over 550 million people to show the current level of achievement of the SDGs in the Mediterranean region. After an analysis of selected indicators and specific challenges per each of the "Six Transformations" (Sachs et al. 2019), a set of policies are determined and suggested as possible solutions. The scope of the report is to share knowledge and to propose solutions on current trends toward SDGs as a science-policy interface for institutions, policymakers and the private sector.

EDUCATION FOR THE SDGS

The 4th edition of the Siena International School on Sustainable Development focused on the climate crisis, examining the solutions and implications of the decarbonization process for our society and businesses. The School addressed three main questions:

1. Why is decarbonization relevant?
Highlighting the consequences of climate change
2. How to decarbonize?
Looking at technologies, policy making and regulation
3. The role of businesses and finance to decarbonize

Specific focus was placed on three sectors most concerned by the decarbonization process: energy production, agri-food, and industry.

Last day of the Siena School on Sustainable Development 2022

YOUTH

The first edition of the "Mediterranean Youth Solutions Report" provides an overview of the relevant role played by young people and youth-led organizations from the Mediterranean region in the achievement of sustainable development. The Report presents a variety of sustainable development projects realized in 2021 by youth university societies, research institutes, NGOs, and other youth-focused organizations with experience in one or more Sustainable Development Goals. The aim of the publication is to provide young people and innovators the recognition needed to scale-up their innovative proposals.

Sustainable Development in the Mediterranean Report 2021.
Cover Credits: Guido Bellini

2 new regional reports on Youth Soultions and on SDGs achievement in the Mediterranean countries

FOCUS ON SDG2

"Fixing the Business of Food" is a research project aiming to propose a framework to help the agri-food sector align with the Agenda 2030. The framework comprises four pillars:

1. Products and strategies contributing to healthy and sustainable diets
2. Sustainable business operations and internal processes
3. Sustainable supply and value chains
4. Good corporate citizenship

The project aims to map and upscale the reporting and operational practices of companies from the agri-food sector.

University of Siena

Founded in 1240, the University of Siena is one of the world's oldest universities. With a campus of about 15,000 students, it is actively involved in numerous international projects of education, research, mobility and training on sustainable development. In particular, the Santa Chiara Lab serves as an incubator for many multidisciplinary projects on sustainable development, including SDSN Mediterranean, the PRIMA Program (Partnership for Research and Innovation in the Mediterranean Area), and the Prima Observatory on Innovation.

Results from an SDG impact assessment using the SDG Impact Assessment Tool; Picture by Nina Silow

EDUCATION FOR THE SDGS

Together with Chalmers University of Technology, the network's secretariat produced three instruction films for the SDG Impact Assessment Tool. The first film introduces the Agenda 2030 and the 17 SDGs. The second film presents the tool and gives a step-by-step guide on how to use it. The third film gives concrete advice to teachers and facilitators on how to design classes or workshops on sustainable development and SDG impacts.

Together with the International Association of Universities (IAU), SDSN Northern Europe arranged two global online workshops on the use of the SDG Impact Assessment Tool. The aims were to spread its use and make it easier for SDSN and IAU members to apply it in their teaching, research and campus operations. The workshops were scheduled to enable participation from all time zones.

FLAGSHIP INITIATIVE

On the 31st of May 2022, SDSN Northern Europe and SDSN Kenya jointly arranged the global member meeting “Acting for a healthy planet: Environmental Science-Policy Solutions and Pathways”. The SDSN Paris secretariat, the International Institute for Sustainable Development and the UN Environment Programme (UNEP) gave keynote presentations, and four good examples from Kenya and Northern Europe in the area of Science - Policy were presented. Together with UNEP, the two networks also advertised a coming call for Research and Expertise in Environmental Science-Policy.

SOLUTIONS INITIATIVE

The Solution Initiative “MISTRA Carbon Exit” identifies and analyzes the technical, economic and political opportunities and challenges for Sweden to reach the target of net zero greenhouse gas emissions by 2045. After four years of this research programme, funding for four additional years was given by the MISTRA Research Foundation. In addition to peer-reviewed papers, 20 publications have been published on the research programme’s website.

80+ young participants benefited from the psychological support provided during the seminars organized by SDSN Youth Russia

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN member, the European University at Saint Petersburg has launched its new masters program on Energy Politics and Energy Transition in Eurasia. In this program, the students will discuss the future of different energy sources; analyze the energy relations between Russia, the EU and Asian countries; and conduct research on the impact of the energy sector on foreign policy, economics and social development in Russia.

FOCUS ON SDG 3

SDSN Russia focused its work on SDG 3. In March 2022, SDSN Youth Russia held two seminars in the presence of professional crisis psychologists in order to provide psychological support to the young people suffering from stress, anxiety and panic stemming from the events that followed 24 February 2022.

RANEPA

Russian Presidential Academy of National Economy and Public Administration (RANEPA) was founded in 1946 as a public administration school for civil servants. Today, RANEPA is one of the most well-known universities in Russia, hosting a very prestigious business school, and considered a national educational leader in public administration. Its think tank provides top-notch expertise to government officials and its regional campuses spread across 53 Russian regions.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN member, SGM Agency and HSE Institute for Regional Studies and Urban Planning jointly organized the VI Annual Conference with a focus on the sustainable development of Russian cities. The event helped the engagement of knowledge institutions in Russia, such as the Higher School of Economics, SGM Agency, the Russian Union of Industrialists and Entrepreneurs, the Leontief Center - AV Group Consortium, the Center for Strategic Research of the Republic of Bashkortostan, Vladimir branch of the RANEPA, ERA rating agency, and the Faculty of Economics of the Moscow State University.

77 academic members and 14 local & regional government partners

SDG LOCALIZATION

The network has continued disseminating the results of the report "The SDGs in Spanish cities 2020" and offering support to municipalities and regional governments on the implementation and monitoring of the 2030 Agenda. In 2021, REDS worked with the Barcelona City Council and the Generalitat Valenciana on their 2030 strategies. Also, REDS accompanied and advised the regional Government of the Canary Islands in the process of integrating the cultural dimension into the Canary SDGs Agenda.

SDSN Spain_SDG Localization Event organized by REDS

5 publications launched in 2021

Universidad Autónoma de Madrid (UAM)

The REDS association acts as the chapter of SDSN in Spain. The network is hosted in partnership with Universidad Autónoma de Madrid (UAM). The UAM has earned itself a prestigious reputation as a state-of-the-art public university in view of the high-quality teaching and research activities. Guided by its vocation to serve society, the academic and social values of its centers and services are reflected in their activities which aim to enhance solidarity, cooperation and the overall health of people and the environment.

FLAGSHIP INITIATIVE

REDS organized the 4th Conference on Culture and Sustainable Development in collaboration with the Ministry of Social Rights and the Agenda 2030. This edition was held under the theme "Transition to a sustainable culture". More than 80 professionals attended, and almost a hundred followed it online. Also, a hundred participants joined the webinar "Circular Economy in the Cultural Sector" organized by the REDS with the collaboration of Ecoembes, the Spanish national recycling company.

EDUCATION FOR THE SDGS

REDS has established different initiatives to raise awareness and foster engagement with the SDGs. The network organized a seminar for the National Diplomatic School, designed to give a broad vision of the 2030 Agenda to the diplomatic corps and a MOOC (Massive Online Open Course) for policy makers on how to integrate the SDGs into their work and daily lives.

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

Illicit financial flows are one of the reasons why developing countries are often rich in natural resources, yet poor in terms of domestic financial resources. SDSN Switzerland co-organized a conference on this topic at the University of Bern. The results of the research project were discussed with representatives from science, policy, industry, and civil society in order to raise awareness and contribute to the fight against illicit financial flows from developing countries.

SDSN Switzerland's newsletter reaches over 1000 subscribers

SDG LOCALIZATION

SDSN Switzerland launched an all-party, transpartisan, parliamentary group for the SDGs. The network will be acting as the secretariat of the group and will be providing scientific expertise to its members. The focus of the group will be on sustainable economy, transformation of the food system, as well as on the governance of the country's sustainable development.

FOCUS ON SDG 2

SDSN Switzerland focused its work on SDG 2 with the following activities. The Network initiated an Expert Panel for the Future of Food. The panel is working to develop integrated solutions for a sustainable food policy in Switzerland. A white paper shall be presented to the new parliamentary group for the SDGs and should serve as a scientific basis for a new Food Policy of the Swiss government. Furthermore, SDSN Switzerland co-initiated the first national citizens' assembly for food policy. It consists of 100 people representing the Swiss population who will work on recommendations for policymakers and other stakeholders.

39 parliamentarians joined the all-party parliamentary group for the SDGs

Centre for Development and Environment

Centre for Development and Environment or "CDE" is Switzerland's centre of excellence for sustainable development. It is one of the University of Bern's strategic research centres tasked with mainstreaming sustainability throughout the university's research and teaching. Its aim is to chart pathways to sustainable development and to initiate transformations in line with the Agenda 2030.

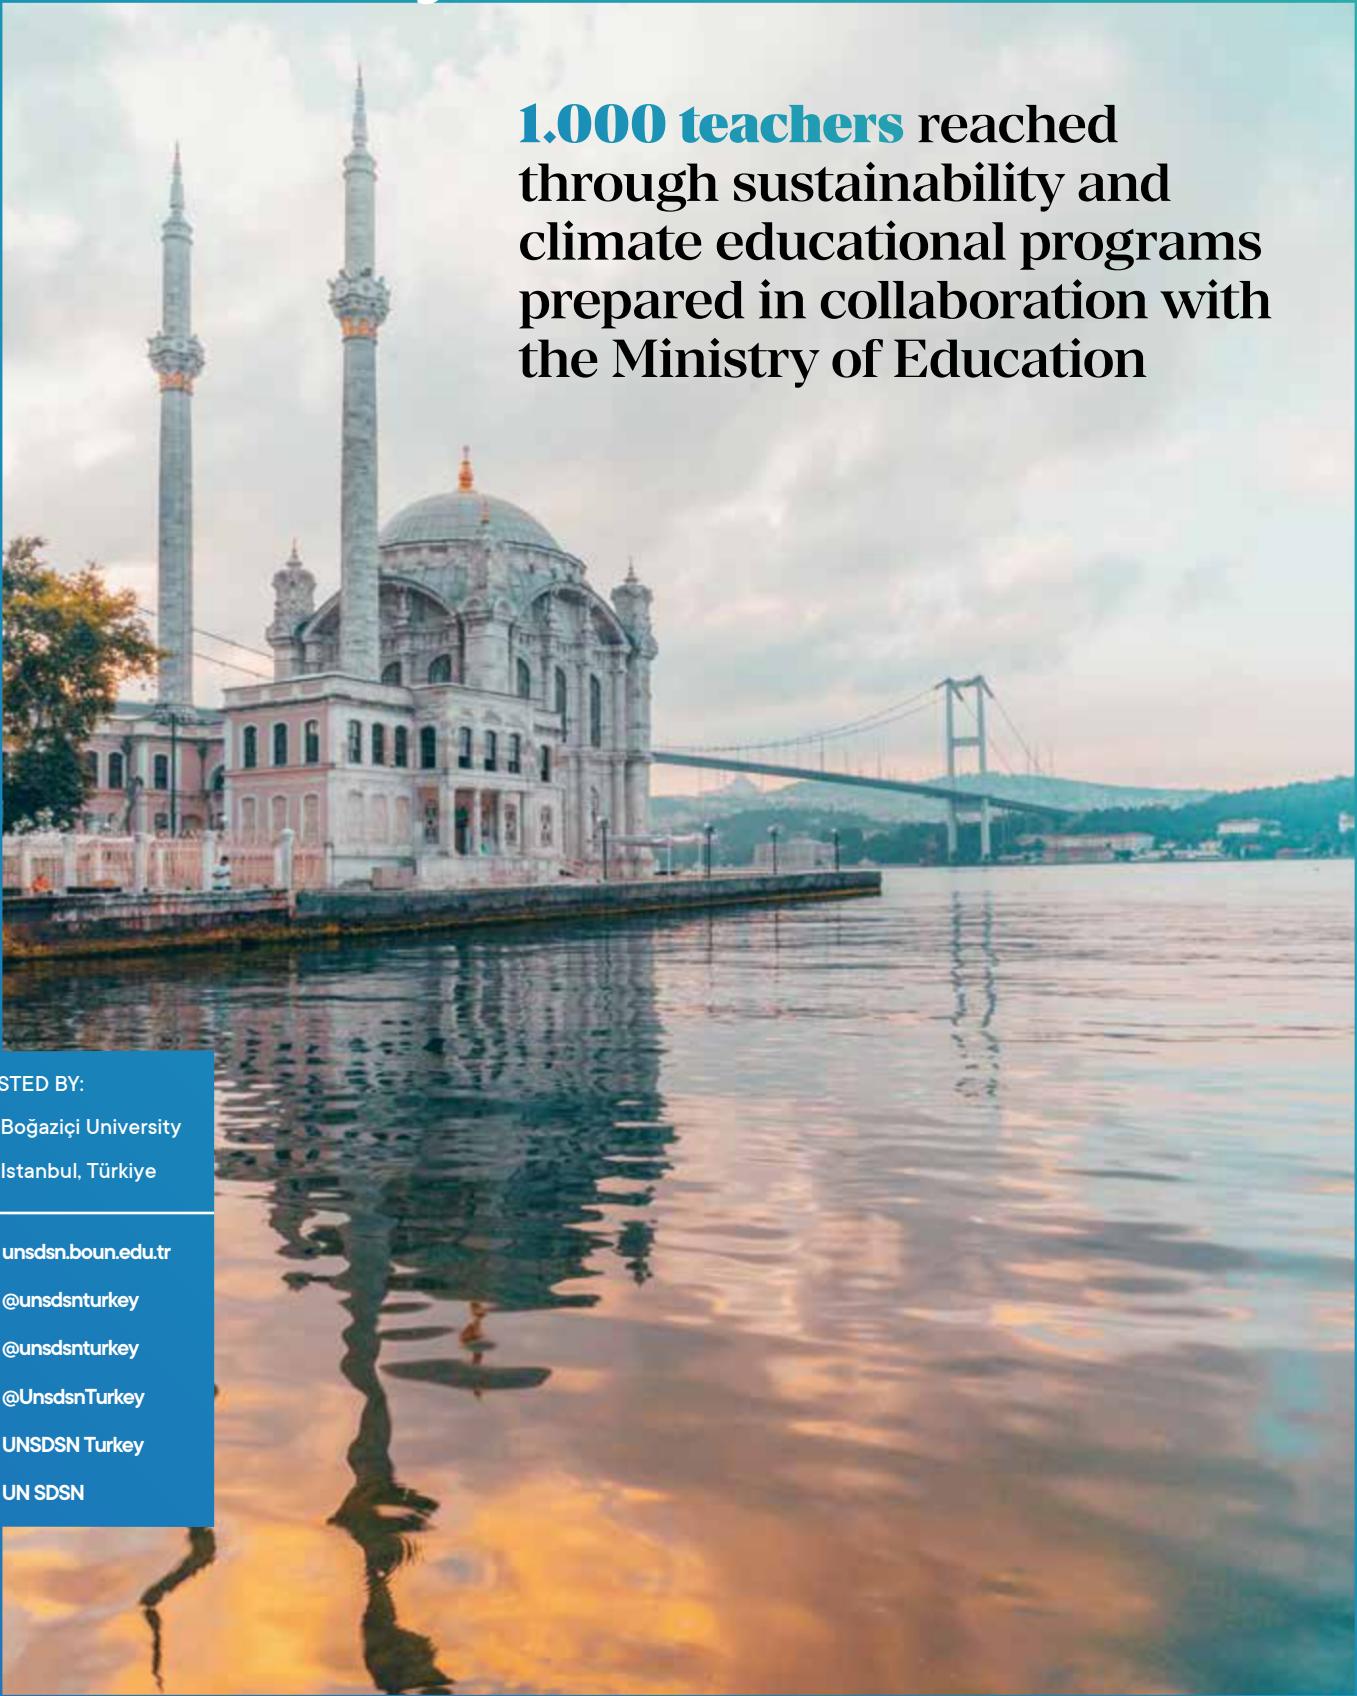

Biovision Foundation

Founded in 1998, Biovision combats hunger and poverty at their roots. Through its active participation in the negotiations, Biovision captures the transformative power of the Agenda 2030 and the political processes that will support such a transformation. In Switzerland and internationally, Biovision is known for conducting a constructive dialogue with different stakeholder groups.

The Climate Academy provided education on SDG entrepreneurship to 1.000 young engineers in Türkiye

EDUCATION FOR THE SDGS

SDSN Türkiye collaborates with UNESCO and the Ministry of National Education of Türkiye on promoting Education for Sustainable Development. The Network organized various SDG educational programs for k-12 school student and teachers. Among these programs, Teachers 2030: Mobilization for SDGs and Climate Action received the support of Schneider Electric.

Also, SDSN Türkiye translated into Turkish two UNESCO publications, "Education for Sustainable Development Goals Learning Objectives" (2017), "ESD for 2030 Roadmap" (2020); as well as the MOOC on How to Achieve the SDGs by the SDG Academy.

FLAGSHIP INITIATIVE

In October 2021 SDSN Türkiye organized a Summit on Corporate Social Responsibility under the theme "Act Now", with the participation of Jeffrey Sachs, president of SDSN, and various institutions such UNDP and the European Bank for Reconstruction and Development (EBRD).

Boğaziçi University

Boğaziçi University was founded in 1863 as the first American college outside of the United States and is one of the leading institutions of higher education in Türkiye. The University shapes the future through being a pioneer in education and teaching experiences with innovative and creative approaches. With this vision of strengthening the culture of science, research, creativity, and innovation the University works hard to become one of the leading research universities in the world. The University teaches its students openmindedness and ethical values, respect for nature and environment, providing them with a capacity to take on leadership positions anywhere in the world.

Teachers 2030: Mobilization for SDGs and Climate Action

PARTICIPATION IN SDSN INITIATIVES

The network engaged with several initiatives of the SDSN. In various conferences held in Türkiye, SDSN Türkiye collaborated with SDSN Europe initiative. The network also built on the courses of the SDG Academy to organize educational programs on sustainability, water, energy, and gender equality. Finally, the network presented the Sustainable Developement Report 2021 to its stakeholders at an online event.

Over 2.500 children and young people attended the educational programs "SDGs and Climate 2030: SDGs and Climate Change Education in Türkiye" among others

SOLUTIONS INITIATIVE

SDSN Türkiye participated in the Global Solutions Forum 2022 organized by SDSN in Dubai. The Network, as an active policy entrepreneur, presented its education and advocacy activities to mobilize the municipalities, the national government, ministries, and NGOs and showcased how SDSN Türkiye acts as a connector and facilitator in the region.

Over 160 attendees for the first event in the ‘Walking the talk: Getting serious about the UN Sustainable Development Goals’ event series

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

The SDSN UK hub held its official launch on 31st January 2022. IIPP Founding Director, Professor Mariana Mazzucato opened the event with a welcome address, followed by a keynote speech from Professor Jeffrey Sachs, the UN SDSN President. Key addresses were also followed by four project showcases from SDSN UK members. Newcastle University and IIPP presented case studies on their policy work, and the University of Strathclyde and University Manchester presented on innovative student initiatives.

Promotional slide for the 'Walking the talk: Getting serious about the UN Sustainable Development Goals' event series / UCL IIPP

UCL Institute for Innovation and Public Purpose (IIPP)

IIPP at University College London (UCL) has the mission to change how public value is imagined, practiced and evaluated to tackle societal challenges and, by doing this, deliver economic growth that is innovation-led, sustainable and inclusive. IIPP encourages people to imagine a new role for the public sector as an ambitious and entrepreneurial partner with the private sector. The institute is nested within UCL, which is one of the UK's premier universities, consistently ranked in the world's top 10 and whose staff and former students have included 32 Nobel Prize winners. IIPP forms part of the Bartlett Faculty of the Built Environment, ranked third for Architecture and the Built Environment in the QS World Ranking.

PARTICIPATION IN SDSN INITIATIVES

SDSN UK has contributed to the organisation and speaker nomination process for the 2021 Zero Emissions Solutions Conference (ZESC). The conference was hosted by the Global SDSN team and took place alongside COP26 in Glasgow.

SDG LOCALIZATION

SDSN UK has partnered with UN Global Compact Network UK to produce the 2022 'Measuring Up' report, which is assessing the UK's performance against the SDGs. An executive summary of this report is being launched at the time of the 2022 High Level Political Forum on Sustainable Development, with an official launch for the publication of the full report being planned for September 2022. The report aims to mobilise a diverse group of stakeholders, and to call on the UK Government to uphold its commitments from the first UK Voluntary National Review and establish actionable plans for achieving the SDGs.

FLAGSHIP INITIATIVE

UCL IIPP organised the 'Walking the talk: Getting serious about the UN Sustainable Development Goals' public event series, which brought together world-leading thinkers, policymakers, urban designers and artists to think deeply about the tools that they are using to advance the SDGs and the challenges they face. All SDSN UK members and the broader global SDSN community were invited to attend this event series.

Jasmina Selimovic, SDSN WB co-chair, at the Sarajevo Economic Forum

Newly formed Leadership Council consists of 15 visionary development leaders from academia, business, NGOs as well as from SDSN Greece and SDSN Europe

ENGAGEMENT WITH KNOWLEDGE INSTITUTIONS

SDSN Western Balkans was launched on March 3rd 2022 in the presence of professors Jeffery Sachs and Phoebe Kounduri, as well as the host institution president Dr. Zlatko Lagumdzija. The launch event gathered high officials, academics, and researchers from B&H as well as representatives of prominent educational and economic institutions in the region. Held in a hybrid format, the launch received excellent media coverage in B&H.

100 participants attended the different fora dedicated to the SDGs co-organized by the network

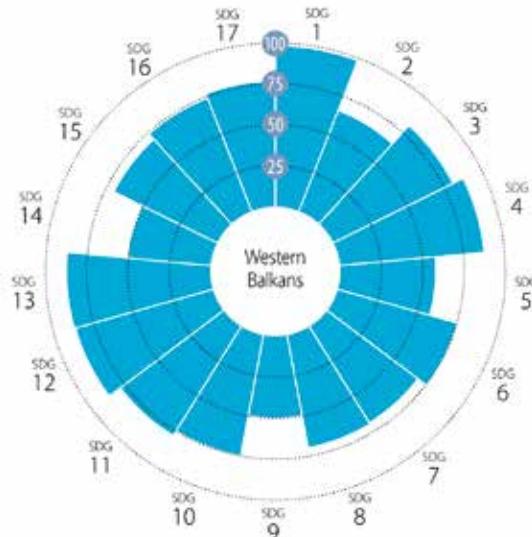

SDG LOCALIZATION

SDSN Western Balkans co-organized the Sarajevo Economic Forum and presented the regional edition of the 2022 Sustainable Development Report at the event. The forum featured 2 sessions dedicated to Sustainable Development: "Global challenges and Western Balkans: Sustainable Development, Resilience, Restart and Recreation" and "Mobilizing Green Finance to Restore and Accelerate the SDGs Progress".

FOCUS ON SDG 17

SDSN Western Balkans focused its work on SDG 17 with the following activities. Together with a number of member organizations and partner institutions, the Co-Chair and the Manager of SDSN WB attended the IX Global Baku Forum in Azerbaijan. The network supported a number of sessions relating to Globalization and Rising Inequalities, Global Health Governance, Climate Change, and the position of the Western Balkans in Europe today. The Co-Chair of the Network moderated these sessions with over 25 panelists.

Average performance of the region according to the SDR 2022

Sarajevo Institute of Economics

Sarajevo Institute of Economics is the oldest and most renowned research organization in the field of applied economics in Bosnia and Herzegovina. Through its activities, the Institute is contributing to the building of a functioning market economy, rising competitiveness and well-being. The institute promotes active participation in policy formulation, implementation, monitoring and evaluation. Besides its internal staff, the institute is supported by over 100 professors and research assistants from the University of Sarajevo - Sarajevo School of Economics and Business. The Institute also has a long-term cooperation with other respected researchers in Southeast Europe.

Shared Society and Values Foundation

Shared Society and Values Foundation is a Sarajevo-based organization with a mission to introduce, support, promote and implement the concept of shared societies and values globally, regionally and within individual societies. As a partner of the World Leadership Alliance - Club of Madrid, the foundation is providing opportunities for local leaders, academics, and researchers. The foundation strives to raise awareness through seminars, workshops, conferences, and scholarships, primarily focusing on the countries of the Western Balkans.

Good Governance of Extractive and Land Resources

HOSTED BY:

The Columbia Center on
Sustainable Investment
(CCSI)

New York, USA

unsdsn.org/extractive-and-land-resources

Pit Mine by Michael Gaida

Webinars average over 250 participants

The Columbia Center on Sustainable Investment (CCSI)

The Columbia Center on Sustainable Investment (CCSI), a joint center of Columbia Law School and the Earth Institute at Columbia University, is the only university-based applied research center and forum dedicated to the study, practice and discussion of sustainable international investment. Their mission is to develop practical approaches for governments, investors, communities, and other stakeholders to maximize the benefits of international investment for sustainable development.

SDG LOCALIZATION

The SDSN Thematic Network on the Good Governance of Extractive and Land Resources looks at how to improve resource use, including land, for sustainable development. In partnership with the SDSN Amazonia and SDSN Member Instituto Quadrilatero, this network hosts a working group on mining and the SDGs, which promotes good governance and practices, and explores how mining territories can achieve the SDGs, particularly through stakeholder engagement. The group ran a webinar series on this topic throughout 2022.

This Network also supports work on food and land. In December 2021 they released a framework to help food processing companies, investors, and other stakeholders understand how the food sector can and should align with the SDGs. While geared toward the food sector, many of the standards are relevant and adaptable to other sectors. The four-pillar Framework defines what SDG-alignment looks like across issue areas and business activities, using a due diligence approach adapted from the UN Guiding Principles for Business and Human Rights.

The Commission's work has been covered by over **130 media outlets** around the globe

Screenshot of the World Health Organization's COVID-19 Dashboard, July 19, 2022.

Globally, as of 6:21pm CEST, 18 July 2022, there have been 559,469,605 confirmed cases of COVID-19, including 6,361,157 deaths, reported to WHO. As of 12 July 2022, a total of 12,130,881,147 vaccine doses have been administered.

Barcelona Institute for Global Health

The Barcelona Institute for Global Health (ISGlobal) was set up in 2010 as a centre of excellence in research and knowledge equipped to meet the new challenges facing global health in the 21st century. Today, ISGlobal encompasses over 30 years' experience in the field of health and is a consolidated hub of expertise in scientific research, drawing on experiences from both hospitals and academic institutions.

Fundaão Oswaldo Cruz

For over 100 years, Fiocruz has produced and disseminated knowledge and technologies to strengthen and consolidate the Unified Health System and contributed to the promotion of health and quality of life in Brazil. Fiocruz works to reduce social inequalities, support innovation, and defend the right to health.

Public Health Foundation of India

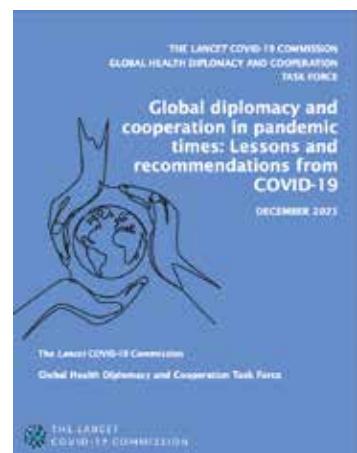

The Public Health Foundation of India (PHFI) is a public-private initiative that has collaboratively evolved through consultations with multiple constituencies, including Indian and international academia, state and central governments, multi & bi-lateral agencies, and civil society groups. PHFI is a response to redress the limited institutional capacity in India for strengthening training, research, and policy development in the area of public health.

The Commission's top tweet in May 2022 received **over 50,000 impressions**

SDG LOCALIZATION

For the past 2 years this network has led and supported The Lancet COVID-19 Commission, hosted by the SDSN. The Commission is an interdisciplinary initiative that promotes solutions to improve global public health and support an equitable, transformative, green, and digital recovery. The Commission's final report will be published in the fall of 2022. It will make key recommendations to strengthen resilience to future shocks through strengthening global coordination and the multilateral system, investing in the production of medical commodities (e.g., vaccines, therapeutics, personal protective equipment, medical devices) in all countries and regions, and investment in primary health systems to ensure achievement of SDG3 (health for all) by 2030.

Wageningen University & Research

The mission of Wageningen University and Research is to explore the potential of nature to improve the quality of life. The strength of Wageningen University & Research lies in their combination of specialised research institutes with the university, as well as their strong expertise in the natural and social sciences. This union of expertise leads to scientific breakthroughs that can quickly be put into practice and be incorporated into education.

Over 800 individuals have joined one or more webinars organized by this group in the past 18 months

FOCUS ON SDG 2

SDSN Sustainable Agriculture and Food Systems focused its work on SDG 2 with the following activities. In partnership with Foresight4Food and APRA, the Network ran another e-Dialogue series to explore who is at risk of being left behind as food systems transform. The first session of the series explored the successes and failures of integrating social inequality considerations into food systems research. Two key takeaways from this session were the need to listen to the voices of beneficiaries of programs and enable them to implement their own solutions, and the need for more disaggregated data to track progress. A second session looked at how the COVID-19 pandemic disrupted agri-food systems, concluding that digitalization was a key to resilience, for example by allowing for remote extension services, but that the digital divide is a major barrier. The third webinar considered links between commercialization and inequality, concluding that access to credit and capital, tax breaks, and safety nets, are key inputs for successful agribusiness, and that they are more accessible to older men than to women and youth.

SDSN

Thematic Research Network on Data and Statistics (TReNDS)

HOSTED BY:

SDSN Secretariat

 sdsntrends.org

 [@sdsn_TReNDS](https://twitter.com/sdsn_TReNDS)

 [SDSN TReNDS](#)

Photo by ConciseSoftware

SDSN's Thematic Research Network on Data and Statistics (TReNDS) is a global research network that facilitates better evidence-informed decision-making by producing actionable research on data innovations, supporting local capacity building in Global South institutions, and documenting both processes to encourage replicability and progress so policymakers and practitioners, particularly those based in the Global South, can capitalize on new data technologies and approaches to address sustainable development challenges. TReNDS' efforts to improve data and evidence support its long-term objective of contributing to better government performance through effective policy implementation, better management of resources, strengthened service delivery, and improved citizen engagement that increases trust and accountability in government and contributes to democratic values.

Cover of Earth Observation Report / Photo by ConciseSoftware

SDG LOCALIZATION

TReNDS hosted several high-level events for key stakeholders throughout 2021 and 2022, including an event on how to enhance data use at the UN Statistical Commission and a webinar as part of the UN World Data Forum event series that showcased insights from city Chief Data Officers on innovations to improve service delivery for citizens.

TReNDS' latest research paper explores the bottlenecks to use and the types of partnerships that may prove beneficial to overcoming the challenges of harnessing the breadth and complexity of Earth Observation data, drawing from interviews with West African institutions and the grey literature.

In 2022–23, to address the new range of development challenges and opportunities, TReNDS will continue to increase its country engagement and role within the Data For Now (D4N) initiative, co-led by TReNDS, the World Bank, the Global Partnership for Sustainable Development Data, and the United Nations Statistics Division, specifically leading on work in Rwanda, Ghana, and Vietnam to facilitate the use of non-traditional data sources for timely and informed decision-making.

TReNDS will also place greater emphasis on data use for evidence-informed decision-making as part of its work programme via its 'Avoiding Data Graveyards,' citizen science, and POPGRID projects, and its workstream on enhancing cross-sector learning between Chief Data Officers in Smart Cities and national government statisticians.

And lastly, TReNDS will also continue to expand its connection with the Global South data research communities and emphasize South-South collaboration within its work, as we believe that Global South technical capabilities and cultural values will play a larger role in how data is used for decision-making in the UN's Decade of Action to deliver the Global Goals.

New and Upcoming Networks

Newly Approved

"All-Island" SDSN Ireland

University College Cork and Queen's University Belfast are establishing an "All-Island" SDSN Ireland - an innovative approach bridging both Northern Ireland and the Republic of Ireland. SDSN Ireland will be a North-South cooperative network focused on developing context-specific solutions and mobilizing local action for the SDGs. Engaging universities, research centers, local authorities, NGOs, civil society organizations and policymakers, the Network plans to bring the latest research to bear on producing solutions for the SDGs and will seek to empower individuals and organizations within Ireland to achieve impact through education and engagement.

SDSN Bulgaria

The University of National and World Economy in Sofia (UNWE), one of the oldest and most prestigious universities in Bulgaria and Southeast Europe, is setting up a National SDSN for Bulgaria. SDSN Bulgaria aims to establish and develop the leading SDG platform in Bulgaria for universities, research institutes, companies, government, and local municipality bodies, as well as organizations of civil society, enabling all members and partners to act for the sustainable future and to have an impact on society at large. The network's mission is to encourage the implementation and achievement of the SDGs at a national and local level.

SDSN Chile

SDSN Chile is hosted by the Institute for Sustainable Development (IDS) at the Pontifical Catholic University of Chile, a university with a long tradition in sustainable development teaching and research. The IDS is a university-wide interdisciplinary academic unit aimed at responding to environmental crises through its programmatic and research contributions, as well as by collaborating with society-at-large. The network will focus on increasing SDG awareness and engagement across the country via a series of alternating webinars and podcast episodes hosting an annual Sustainability Solutions Festival to showcase innovative initiatives and tracking SDG performance and distance-to-targets at the regional and local levels.

SDSN Czechia

SDSN has established a national network hosted by the Charles University Environment Center (CUEC), the country's leading research institution focused on interdisciplinary sustainability science. Founded in 1348, Charles University is the oldest university in Central Europe, and the largest, most renowned and the best-rated institution of higher education in Czechia. SDSN Czechia will focus on bringing universities and research institutions together with businesses, governmental bodies and NGOs in order to develop and implement practical solutions with a potential to deliver transformative change.

SDSN Ghana

Approved in early 2022, SDSN Ghana is hosted by the University of Ghana and the University of Education, Winneba, with support from Millennium Promise Ghana. The network has already established a Governing Council which includes the leadership of the three co-hosts and high-level representatives such as the Special Advisor on the SDGs to the President of Ghana, the Minister of Education, and the UNDP Resident Representative. The network plans to officially launch before the end of 2022.

SDSN Kazakhstan

In June 2022, Nazarbayev University officially launched SDSN Kazakhstan. The focus areas of the new network are the promotion of practical solutions for long-term sustainable pathways in Kazakhstan, support to high-quality education and research collaboration on SDGs, and applied research and policy initiatives for better addressing the challenges of sustainable development in Kazakhstan. SDSN Kazakhstan currently has 20 members.

Upcoming Networks

Benin

The Government of Benin has partnered with SDSN to help monitor the country's performance and efforts towards the SDGs. This technical partnership will notably rely on a new network, which will mobilize national expertise to support the Government's efforts to achieve the SDGs and the Paris Climate Agreement. Discussions are ongoing with the Finance Ministry's Directorate for Research and Strategic Studies and the University of Abomey-Calavi (UAC) to co-host SDSN Benin.

Ethiopia

Ethiopia is the second most populous nation in Africa and has 59 universities across the country, the oldest and largest of which is Addis Ababa University (AAU). As part of its global mission, AAU is eager to set up an SDSN chapter. The College of Business & Economics is currently developing a proposal to effectively advance the implementation of SDGs by mobilizing academia at the national level.

Portugal

Portugal has a strategic connection with South American countries and in particular, Portuguese-speaking regions like Brazil. The global network already has eight members from this country within the SDSN Mediterranean. The Center for Studies in Geography and Spatial Planning (CEGOT) and the Center of Engineering and Product Development (CEiiA), both top research centers promoted by several Portuguese universities, have presented a proposal to co-host SDSN Portugal.

SDSN Member Organizations

(*As of July 27, 2022)

Afghanistan

- Afghan National Association For Adult Education (ANAAFE)
- Afghanistan Research and Evaluation Unit
